

AmarVote

VOTER MANUAL

Vote with confidence, verify with proof.

A complete, step-by-step guide to registering, casting an end-to-end verifiable ballot, and confirming it was counted — exactly as cast.

End-to-end encrypted

✓ Independently verifiable

YOUR JOURNEY

Five steps, start to finish

Everything in this manual fits into one simple path. Jump to any section directly, or follow it in order the first time you vote.

1

Create your account

Part 1

Verify your voter email, confirm a one-time code, and set a strong password.

2

Secure your account (optional)

Part 2

Turn on two-factor authentication for an extra layer of protection.

3

Sign in & find your election

Part 3

Log back in anytime, then locate your election by search, menu, or dashboard.

4

Cast your ballot

Part 4

Pick candidates, encrypt your choices, optionally audit them, then cast.

5

Verify the result

Part 5

After the election closes, confirm your exact ballot was counted — by you, independently.

i

Takes about 5 minutes

ii

No technical knowledge
needed

iii

Your vote stays private

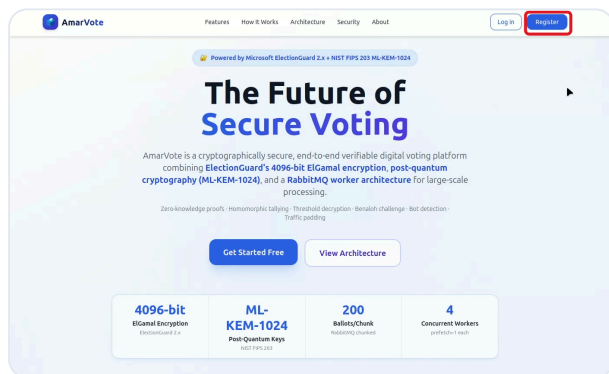

TIP

Throughout this guide, screenshots show exactly what you'll see on screen. Look for the numbered indigo badges — they match the step described beside each image.

Create your account

Registration confirms you're on the official voter list before anything else happens. You'll verify your email, set a password, and land straight on your dashboard.

1.1 Open the registration page

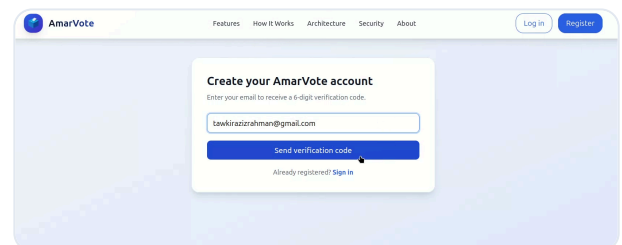

1 Start from the home page

On the AmarVote home page, click **Register** in the top-right corner to begin creating your account.

1.2 Verify your voter email

2 Enter your official email

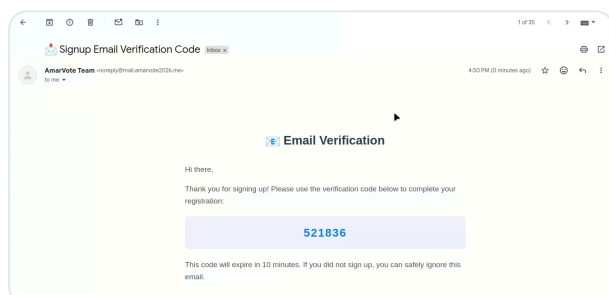

Enter the email address listed for you on the official voter list. AmarVote only grants access to addresses already on this list, so use the one your election authority has on file — not a personal alternative.

NOTE

Using an email that isn't on the official voter list will not pass verification. If you're unsure which address is registered, contact your Batch Representative or Election Officials before continuing.

1.3 Confirm with a one-time code

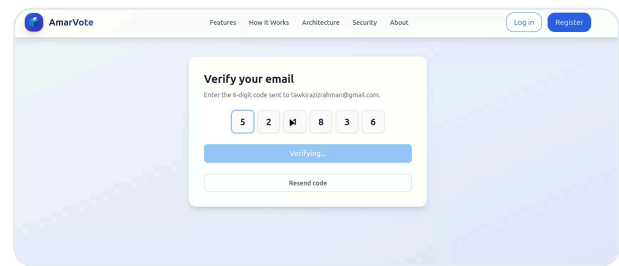

3 Check your inbox

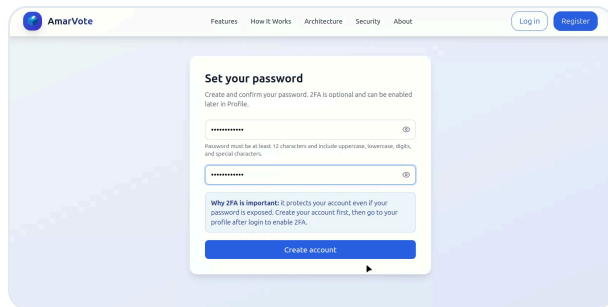

AmarVote emails a 6-digit verification code to the address you entered. It usually arrives within moments — check your spam folder if you don't see it right away.

4 Enter the code

Type the 6-digit code into the verification field to confirm you own this email address.

1.4 Set a strong password

5 Choose your password

Create a password of **at least 12 characters**, combining uppercase letters, lowercase letters, numbers, and special characters. This protects your account from being accessed by anyone else.

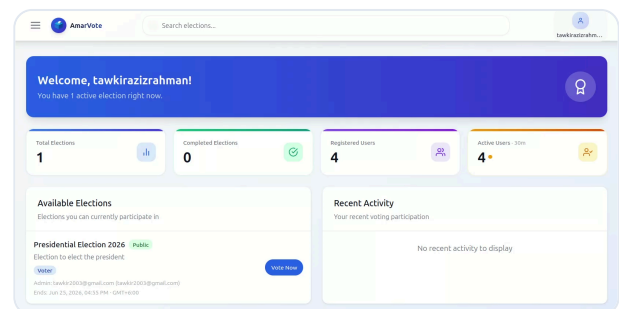

TIP

A password manager makes this easy: generate a long, random password once and let it remember the rest.

1.5 You're in

6 Your dashboard is ready

As soon as your password is set, AmarVote signs you in automatically and opens your personal dashboard. Registration is complete.

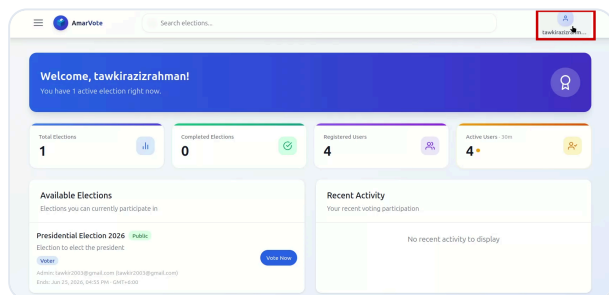

PART 02

Secure your account

Two-factor authentication (2FA) is optional but strongly recommended. It adds a second, time-based code on top of your password, so a leaked password alone isn't enough to sign in as you.

2.1 Open security settings

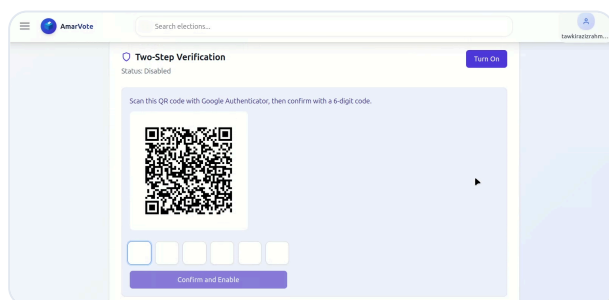

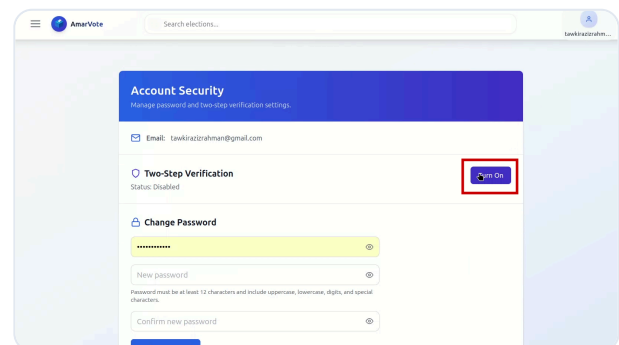

1 Go to your profile

From your dashboard, click your **profile icon** in the top-right corner to open your account settings.

2.2 Turn on two-factor authentication

2 Enable two-step verification

In the **Two-Step Verification** panel, click **Turn On** to begin setup.

3 Scan the QR code

Open an authenticator app (such as Google Authenticator) on your phone, scan the QR code shown on screen, and enter the 6-digit code it generates to confirm the link.

VERIFIED

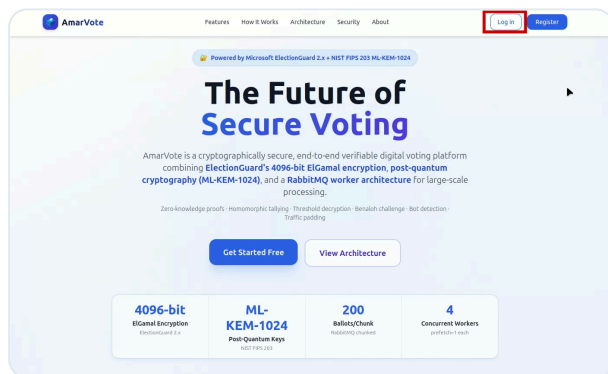

Two-factor authentication is now active on your account. From your next login onward, you'll need both your password and a fresh code from your authenticator app.

PART 03

Sign in & find your election

Once registered, returning to vote is quick. This section also covers the three ways to locate an election: your dashboard, the search bar, and the full elections directory.

3.1 Sign in

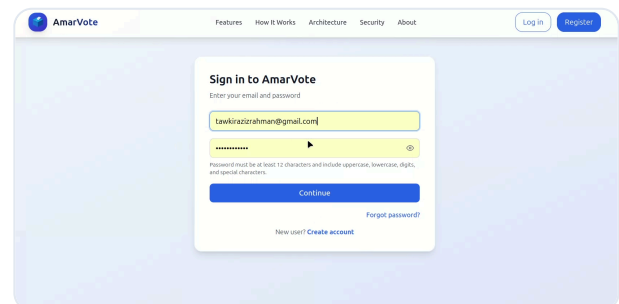

1 Open the login page

From the home page, click **Log in** in the top-right corner.

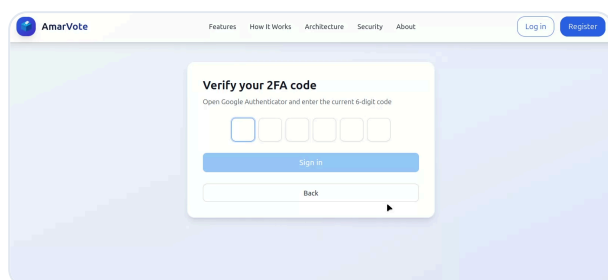

2 Enter your credentials

Enter the email and password you registered with, then continue.

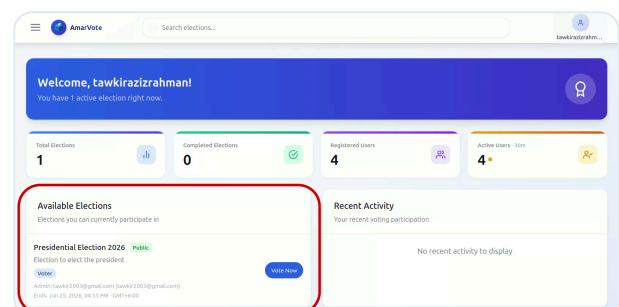

3 Confirm with your authenticator

If you enabled two-factor authentication, enter the current code shown in your authenticator app to finish signing in.

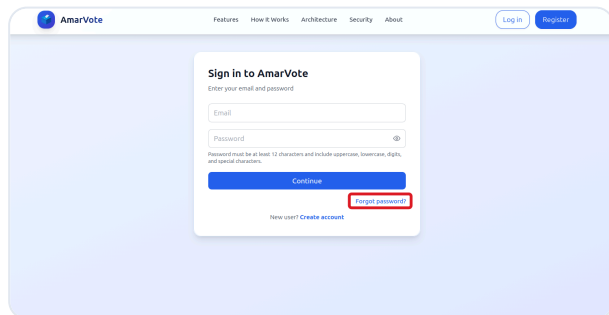

4 You are in

Active elections you're eligible for appear directly on your dashboard. Click any election card to open it.

3.2 Forgot your password?

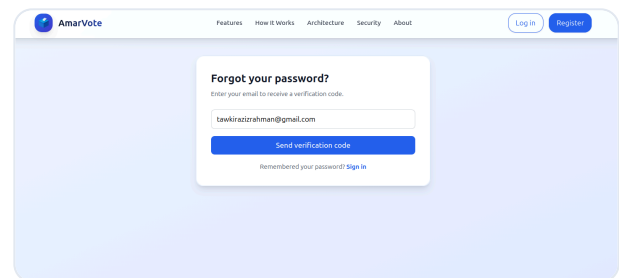

If you no longer remember your password, reset it from the login page. You'll verify your registered email, enter a one-time code, and choose a new password.

The image shows the AmarVote login page. At the top, there's a navigation bar with 'Features', 'How it Works', 'Architecture', 'Security', and 'About'. On the right, there are 'Log in' and 'Register' buttons. The main content area has a 'Sign in to AmarVote' form with fields for 'Email' and 'Password'. Below the password field, there's a 'Continue' button and a red-outlined button labeled 'Forgot password?'. At the bottom of the form, there's a link for 'New user? Create account'.

5 Click Forgot Password?

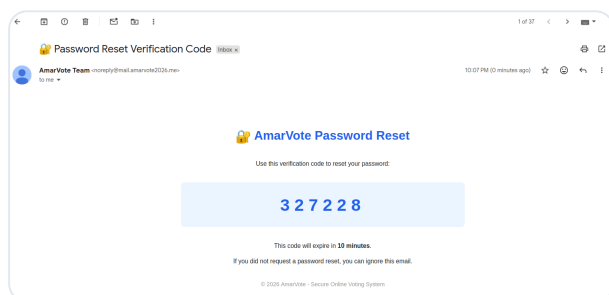

On the login page, click **Forgot Password?** to start the reset process.

The image shows the 'Forgot your password?' page. It has a form with an email field containing 'tawkiratorahman@gmail.com' and a 'Send verification code' button. Below the button, there's a link: 'Remembered your password? Sign in'.

6 Enter your registered email

Enter the email address you used when you registered with AmarVote.

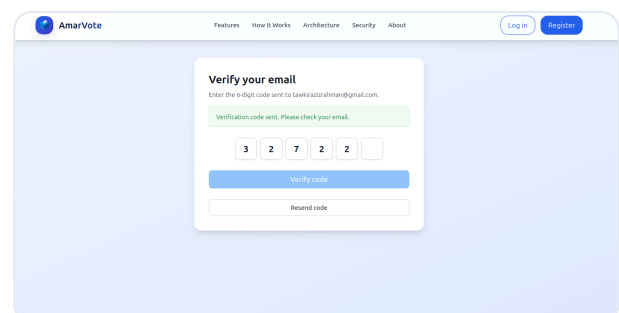

The image shows an email from 'AmarVote Team' with the subject 'AmarVote Password Reset'. The body of the email says 'Use this verification code to reset your password:' followed by a large blue box containing the code '3 2 7 2 2 8'. Below the code, it says 'This code will expire in 30 minutes.' and 'If you did not request a password reset, you can ignore this email.' At the bottom, there's a copyright notice: '© 2020 AmarVote - Secure Online Voting System'.

7 Check your inbox

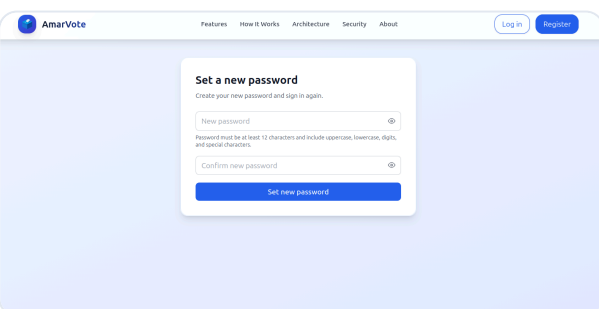

AmarVote sends a 6-digit code to that email address. Check your inbox — and your spam folder if you don't see it right away.

8 Enter the code

Type the 6-digit code into the verification field to confirm your identity.

The image shows the 'Verify your email' page. It has a form with a text input field containing the code '3 2 7 2 2 8' and a 'Verify code' button. Below the button, there's a 'Resend code' button.

The image shows the 'Set a new password' page. It has a form with two password fields: 'New password' and 'Confirm new password'. Below the 'Confirm new password' field, there's a 'Set new password' button.

9 Set a new password

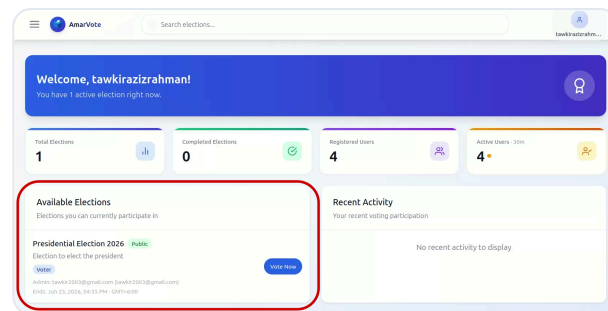

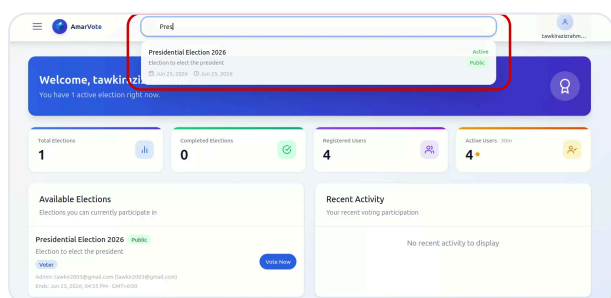

Choose a new password of **at least 12 characters**, combining uppercase letters, lowercase letters, numbers, and special characters. Then sign in with your new password.

3.3 Find your election

There are three equally valid ways to reach an election — use whichever is fastest for you.

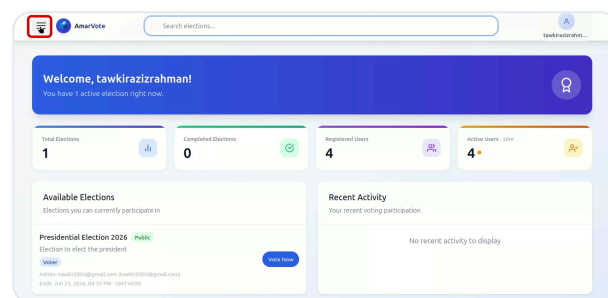

10 Browse from your dashboard

Active elections you're eligible for appear directly on your dashboard. Click any election card to open it.

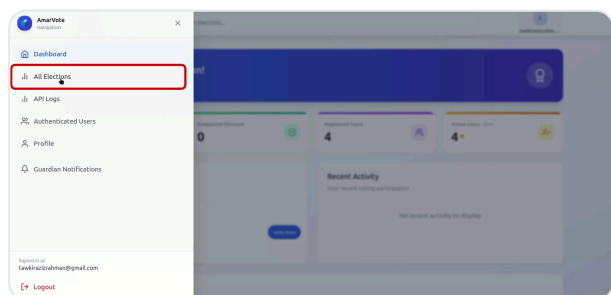

11 Or search by name

Use the search bar at the top of the page to find an election by typing its name.

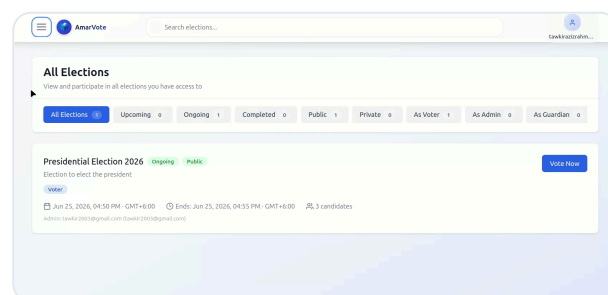

12 Or browse the full directory — open the menu

Click the menu icon in the top-left corner to open the navigation panel.

13 Select "All Elections"

Choose **All Elections** from the menu to see every election you can take part in.

14 Pick your election

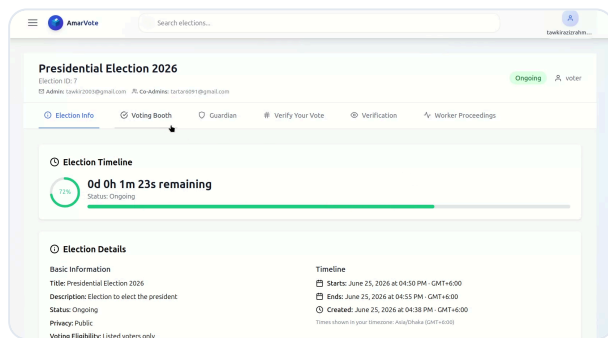

Browse the complete list and click the election you want to vote in.

PART 04

Cast your ballot

This is the core of AmarVote: your selections are mathematically encrypted, you decide what happens to that encrypted ballot, and only a cast ballot is ever counted.

4.1 Review the election

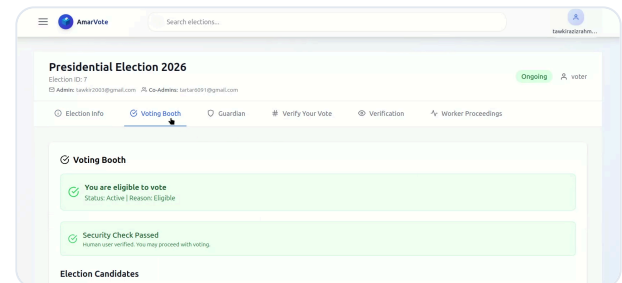

1 Open the election page

Here you'll find key details about the election — timeline, rules, and instructions — before you vote.

4.2 Enter the voting booth

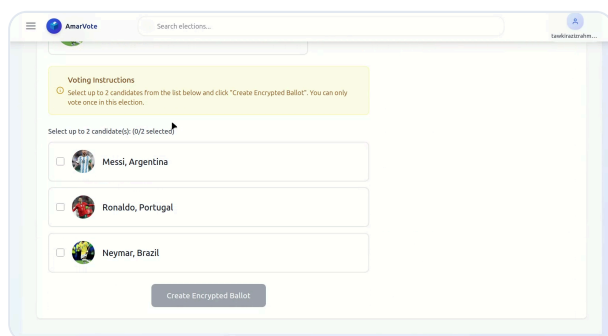

2 Go to the Voting Booth tab

Switch to the **Voting Booth** tab at the top of the election page.

3 Scroll to see all candidates

Scroll down to view the complete candidate list before making your selection.

4.3 Make your selection

4 Select candidates and encrypt

Select up to the number of candidates allowed for this election, then click **Create Encrypted Ballot**. Your choices are encrypted immediately on the server, no plain text choice are stored in the database

The screenshot shows a voting interface. At the top, a yellow box contains 'Voting Instructions' with a note: 'Select up to 2 candidates from the list below and click "Create Encrypted Ballot". You can only vote once in this election.' Below this, a green box states 'Select up to 2 candidate(s): (2/2 selected)'. There are three candidate rows: 'Messi, Argentina' with an unchecked checkbox, 'Ronaldo, Portugal' with a checked checkbox, and 'Neymar, Brazil' with a checked checkbox. At the bottom right is a blue button labeled 'Create Encrypted Ballot'.

4.4 Choose what happens next

The screenshot shows a confirmation screen titled 'Encrypted Ballot Ready' with a green checkmark icon. The text says: 'Your vote has been encrypted. Cast your ballot, verify it with a challenge, or discard it and start over.' Below this is a 'Download Ballot Files' section with three buttons: 'Ballot', 'With Nonce', and 'Info'. There are three main action buttons: a blue 'Cast Vote' button, an orange 'Challenge Vote' button, and a light gray 'Discard Ballot' button. At the bottom, a small note states: 'During periods of high traffic, casting your vote or verifying your ballot may take a little longer than usual. Please remain on this page and allow the process to complete.'

5 Cast, challenge, or discard

Every encrypted ballot gives you three options:

- **Cast Vote** — submit this ballot to be counted.
- **Challenge Vote** — audit it to confirm it was encrypted correctly (see below).
- **Discard Ballot** — throw it away and start over.

TIP

You can create and challenge as many encrypted ballots as you like. Only a ballot you choose to **cast** is ever counted — challenging or discarding never submits a vote.

4.5 Optional: challenge your ballot

Challenging lets you prove an encrypted ballot truly matches the choices you made — without revealing your vote to anyone else. Click **Challenge Vote**, then re-select the candidates to check against.

Encrypted Ballot Ready ✕

Your vote has been encrypted. Cast your ballot, verify it with a challenge, or discard it and start over.

DIFFERENT CHOICE

Result

Challenge Failed

Challenge Verification Failed

WARNING: Ballot verification failed! The encrypted ballot does NOT match your selected choice. This indicates a potential security issue. Please contact the election administrators immediately.

Return to Voting Booth

NO MATCH

NOTE

No match — and that's correct. This confirms the system honestly reports mismatches rather than hiding them.

NOTE

A challenged ballot is **always discarded**, regardless of the result. This is intentional: once you've used a ballot to verify the encryption, that same ballot can no longer be cast. Return to the voting booth and create a fresh encrypted ballot when you're ready to vote for real.

4.6 Cast your vote

From encryption to receipt

When you're satisfied with your ballot, cast it to submit your vote and receive proof of submission.

1. Encrypt your ballot 2. Cast your vote 3. Get your receipt

Voting Instructions

Select up to 2 candidates from the list below and click "Create Encrypted Ballot". You can only vote once in this election.

Select up to 2 candidate(s): (2/2 selected)

☐  Messi, Argentina

☒  Ronaldo, Portugal

☒  Neymar, Brazil

READY

SUBMIT

RECEIPT ISSUED

VERIFIED

Your vote is cast. AmarVote returns a unique tracking code and ballot hash — your personal proof that this exact ballot was received.

4.7 Save your receipt

The screenshot shows a web application for voting. On the left, a sidebar contains a menu with a 'Voting Booth' section. Under this section, there are three items: 'You have already voted in this election' with a status of 'Active' and reason 'Already voted'; 'Security Check Passed' with a reason 'vote already. Voting process will start soon'; and 'Election Candidates' listing 'Messi, Argentina' and 'Neymar, Brazil'. The main content area displays a 'Vote Cast Successfully' modal. The modal has a green checkmark icon and text stating 'Your vote has been securely recorded. See your tracking code and hash below.' It provides a 'Vote Hash' and a 'Tracking Code', each with a link icon. At the bottom of the modal, there are two buttons: 'See TEXT' and 'See JSON'. Below these buttons, an 'Important' note states: 'Keep your vote hash and tracking code to verify your vote when results are published.' At the very bottom of the modal is a button labeled 'Return to Voting Booth'. In the top right corner, there is a dark notification box with a red 'X' icon and text that reads 'New release! Presidential Race - "Honesty" has been added to the ballot' and a link 'View all downloads'.

7 Download your receipt

Download your tracking code and ballot hash. Keep this safe — it's necessary to verify your specific ballot later, and it never reveals who or what you voted for.

8 Check your email too

AmarVote also sends a copy of your receipt to your registered email, so you have a backup record.

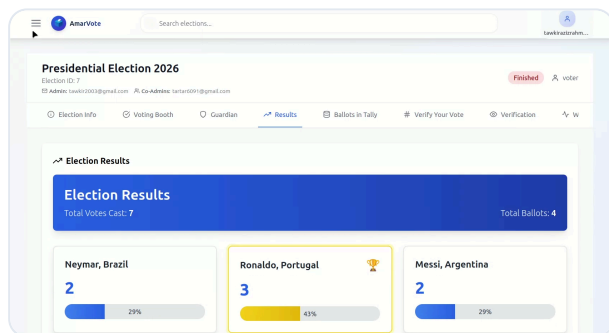

A screenshot of an email interface. At the top, there's a navigation bar with icons for back, forward, trash, archive, and search, along with a status bar showing '1 of 36' and a search icon. The email header shows 'Your AmarVote Receipt - Presidential Election 2026' with a 'BLOCK' button. The sender is 'AmarVote Team' with the email address 'amrvote@amarvote2026.me'. The time is '4:54 PM (2 minutes ago)'. The body text says: 'Your vote was cast successfully. Your receipt is attached as a TXT file. Please keep it for verification. Tracking Code: 7a363cc30f1169e18d969463715a83e775aac274db2bf8e3a3d5e656ba300f'. Below the text is an attachment section titled 'One attachment • Scanned by Gmail' with a 'Add to Drive' button. The attachment is a file named 'vote_receipt_presidential_election_2026_receipt_on_7_fabc3cc30f1169e18d969463715a83e775aac274db2bf8e3a3d5e656ba300f.txt'. A mouse cursor is hovering over the attachment icon.

PART 05

Verify the result

Once the election closes and results are decrypted, you can confirm — independently — that your exact ballot was included in the final tally, untouched.

5.1 See the outcome

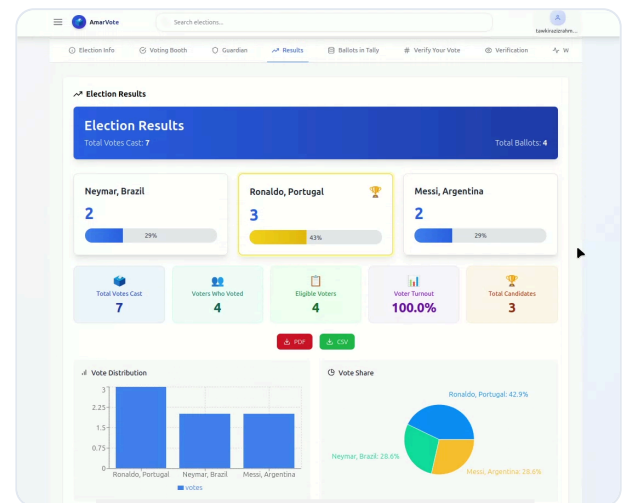

1 Open the Results tab

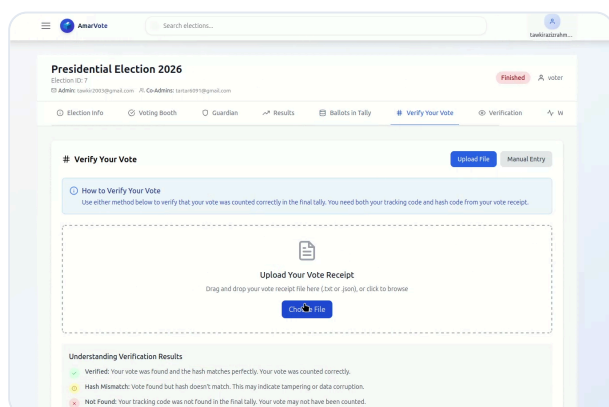

After decryption is complete, open the **Results** tab on the election page to see the outcome.

2 Explore the detailed breakdown

Scroll down for detailed charts and a full breakdown of votes per candidate.

5.2 Verify your own ballot

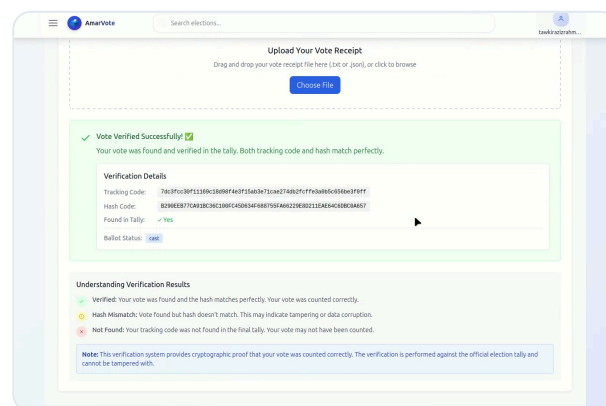

3 Upload your receipt

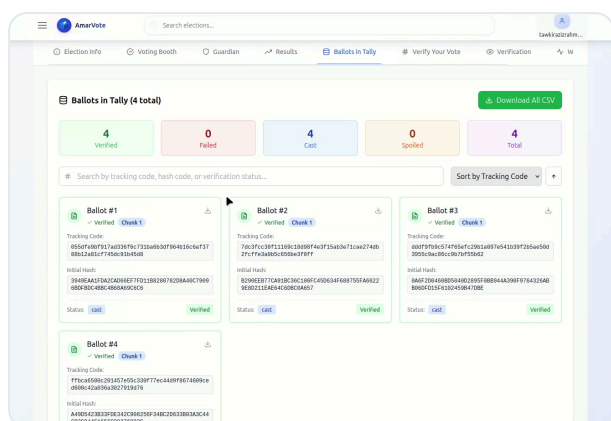

Go to the **Verify Your Vote** tab and upload the receipt file you saved earlier.

4 Confirm the match

AmarVote locates the ballot in the public tally with your exact tracking code and confirms its hash matches your receipt — proof your vote was counted exactly as cast.

5.3 Explore the public tally

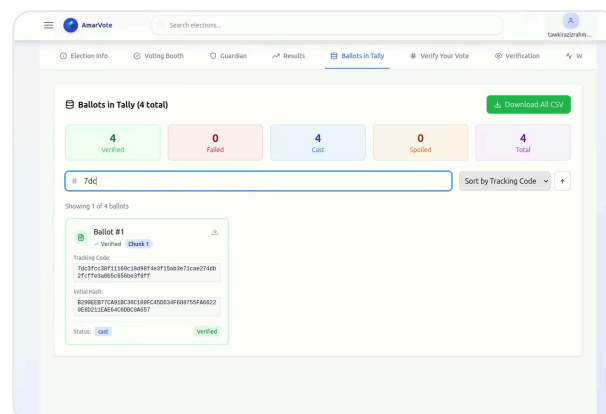

5 Browse every cast ballot

The **Ballots in Tally** tab lists every encrypted ballot included in the count — anonymized, but fully public and auditable by anyone.

6 Or search by tracking code

Prefer to check by hand? Search for your tracking code directly in the tally and compare the ballot hash yourself.

VERIFIED

This is what makes AmarVote **end-to-end verifiable**: you don't have to trust the system blindly. Every cast ballot, your receipt, and the final tally can all be checked against each other — by you.
