June 2026

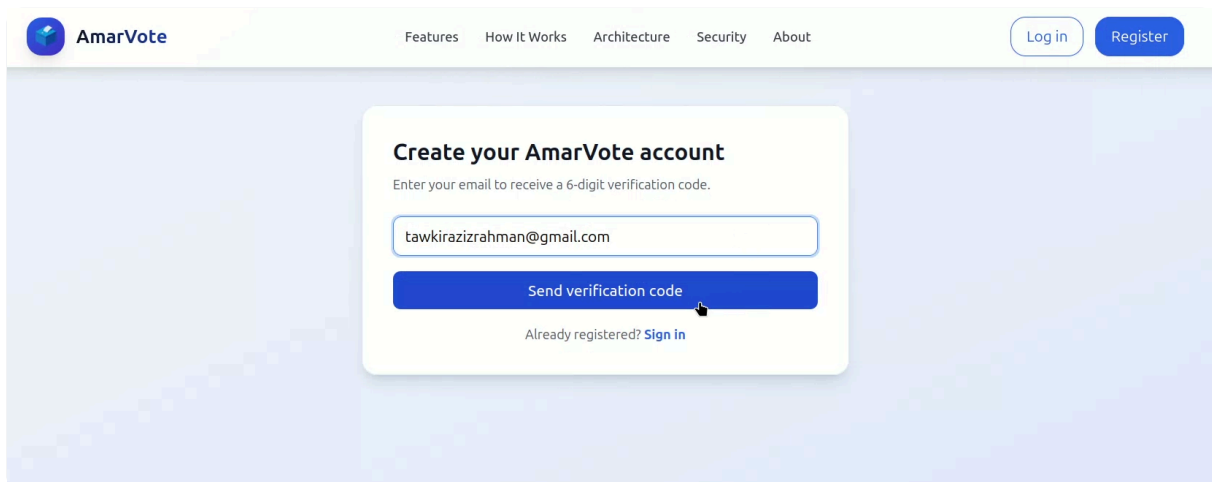

Registration

AmarVote is open only to officially enlisted voters. Your registration uses the email address registered with the election authority.

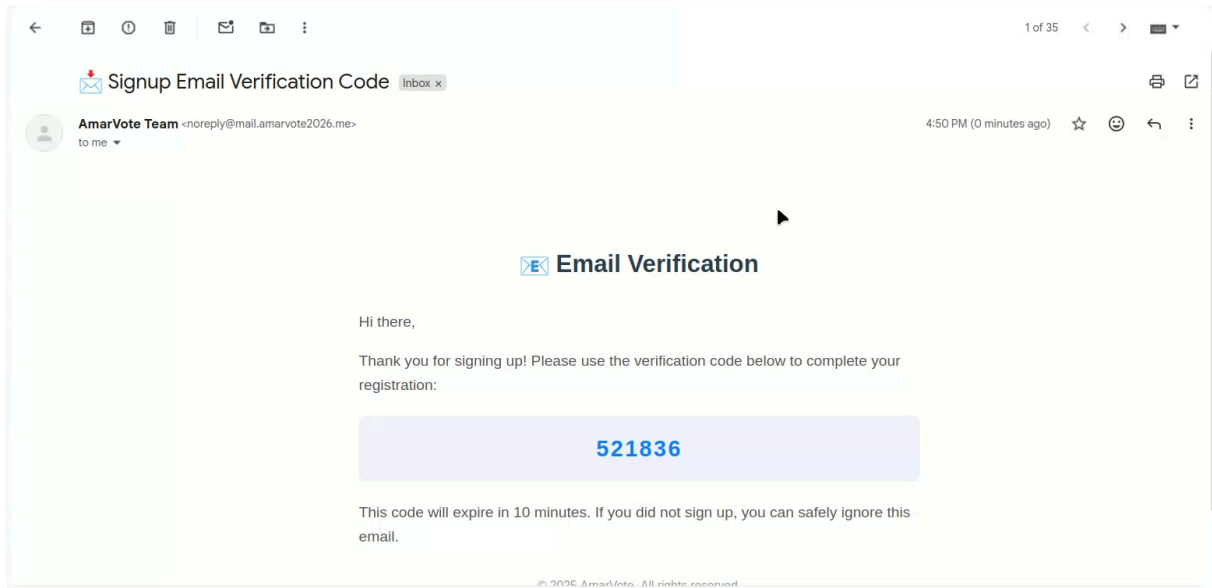

1. From the Home Page, click **"Register"**.

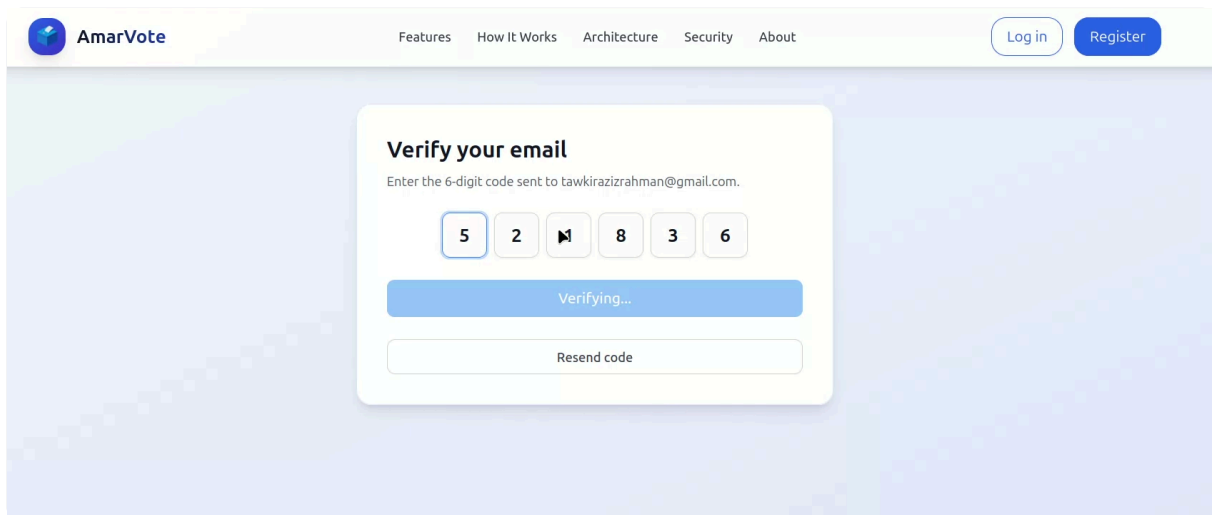

2. Enter the email that is on your voter list, then click **"Send Verification Code"**.

3. AmarVote will send a 6-digit verification code to that email.

4. Input the code on the next screen.

5. You will now be asked to set a strong password. Must be at least 12 characters with uppercase, lowercase, digits & special characters.

The screenshot shows the 'Set your password' registration page. At the top, there is a navigation bar with the AmarVote logo, links for Features, How It Works, Architecture, Security, and About, and buttons for Log in and Register. The main content area has a light blue background with a white card containing the registration form. The card has a title 'Set your password', a subtext 'Create and confirm your password. 2FA is optional and can be enabled later in Profile.', and two password input fields with eye icons. Below the fields, a note states: 'Password must be at least 12 characters and include uppercase, lowercase, digits, and special characters.' A blue box explains 'Why 2FA is important: it protects your account even if your password is exposed. Create your account first, then go to your profile after login to enable 2FA.' At the bottom of the card is a blue 'Create account' button.

6. Once the password is set, you are taken to your Dashboard — registration complete!

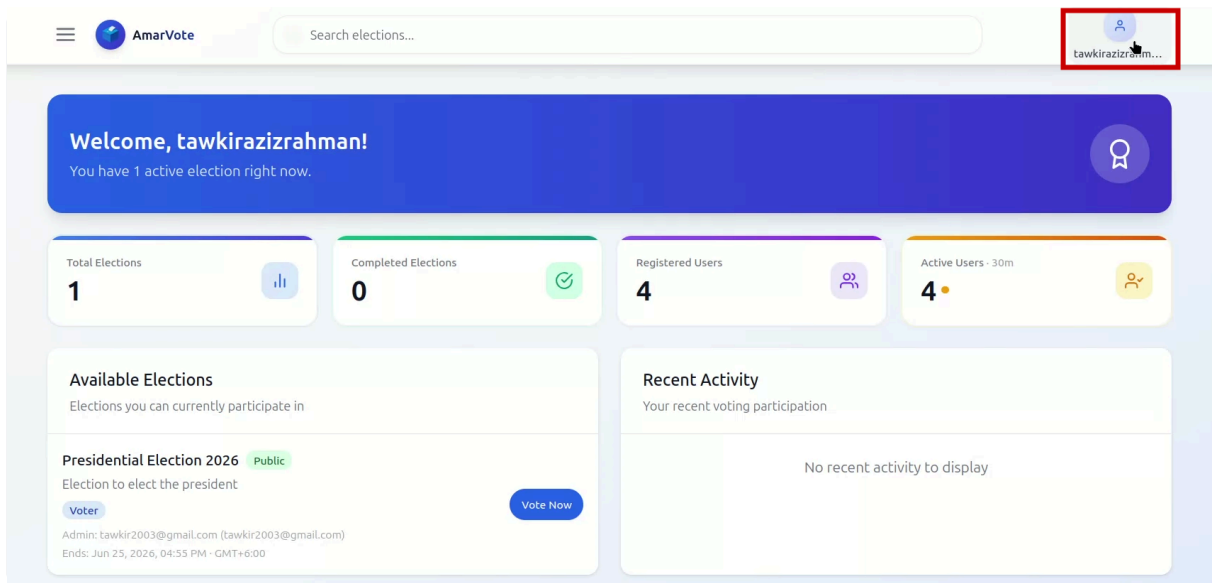

The screenshot shows the user dashboard for 'tawkirazizrahman'. The top navigation bar includes a menu icon, the AmarVote logo, a search bar for elections, and a user profile icon. The dashboard features a blue header with a welcome message and a notification about 1 active election. Below this are four summary cards: 'Total Elections' (1), 'Completed Elections' (0), 'Registered Users' (4), and 'Active Users - 30m' (4). The 'Available Elections' section lists the 'Presidential Election 2026' as a public election to elect the president, with a 'Vote Now' button. The 'Recent Activity' section shows no recent activity.

💡 Keep your password safe.

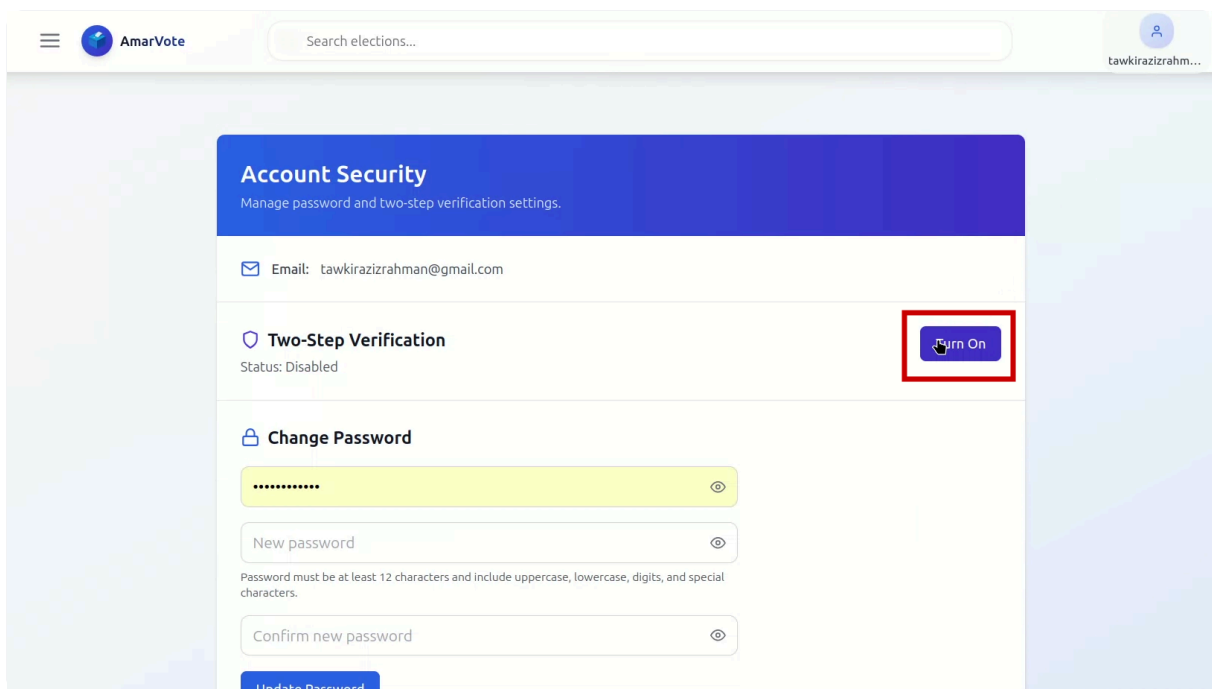

Two-Factor Authentication (Optional)

Enabling two-step verification adds an extra layer of security to your account.

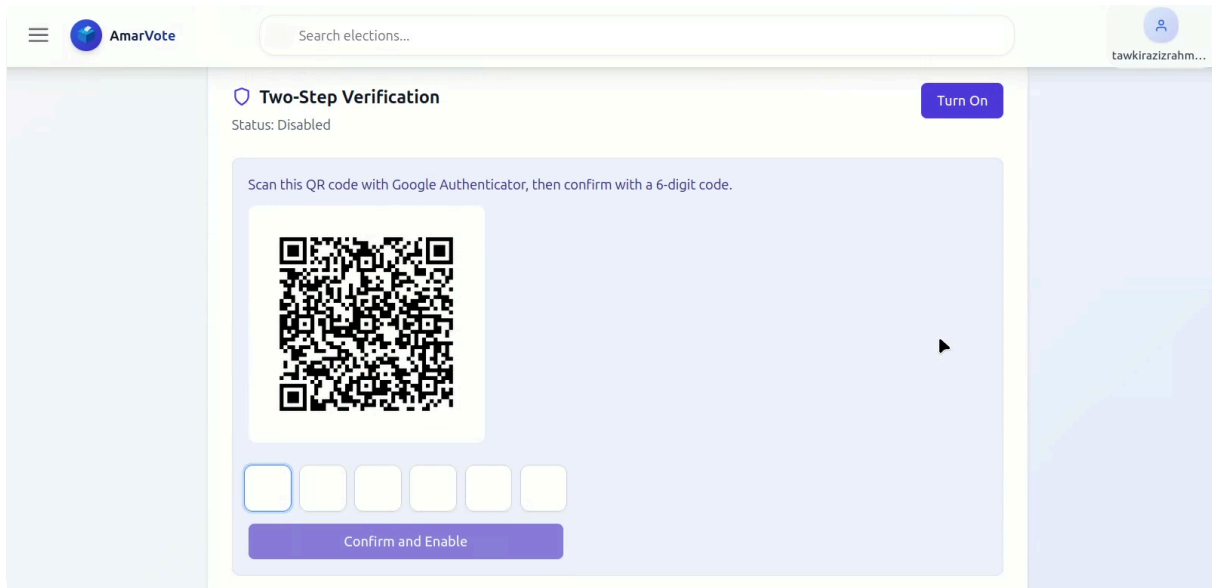

1. On the Dashboard, click the **Profile button** in the top-right corner.

2. In the profile panel, locate “Two-Step Authentication” and click “Turn On”.

3. Scan the QR code with an authenticator app (e.g., Google Authenticator, Authy) and enter the code it displays.

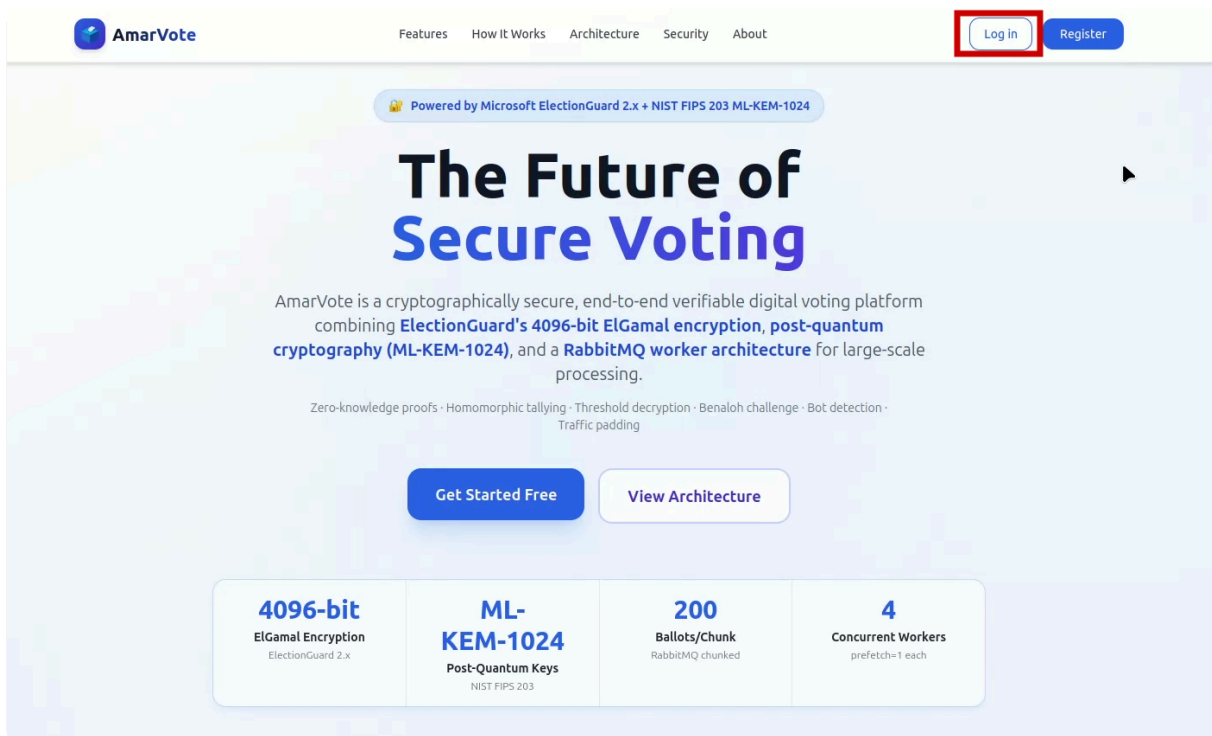

From now on, every login will require a code from your authenticator app.

Signing In

When you return to AmarVote, use the Home Page to log in.

1. Click the **“Log In”** button on the Home Page.

2. Enter your email and password.

Sign in to AmarVote

Enter your email and password

tawkirazirahman@gmail.com

.....

Password must be at least 12 characters and include uppercase, lowercase, digits, and special characters.

Back

4. After successful login, you are back on your Dashboard, ready to vote.

The dashboard shows a welcome message for 'tawkirazizrahman!' with 1 active election. It features four summary cards: Total Elections (1), Completed Elections (0), Registered Users (4), and Active Users (4). Below these are two sections: 'Available Elections' showing the 'Presidential Election 2026' with a 'Vote Now' button, and 'Recent Activity' showing no recent activity.

Category	Value
Total Elections	1
Completed Elections	0
Registered Users	4
Active Users - 30m	4

Forgot Your Password

If you forgot your password, reset it from the login page:

1. On the login page, click **"Forgot Password?"**.

The login page features a 'Sign in to AmarVote' form with fields for Email and Password. A 'Continue' button is below the fields. A red box highlights the 'Forgot password?' link. At the bottom, there is a link for 'New user? Create account'.

Sign in to AmarVote
Enter your email and password

New user? [Create account](#)

2. Enter the email address registered with your account.

3. AmarVote will send a six-digit code to that email.

4. Enter the six-digit code on the next screen.

The screenshot shows the 'Verify your email' form on the AmarVote website. The form is centered on a light blue background. At the top, the AmarVote logo is on the left, and 'Log in' and 'Register' buttons are on the right. The form itself has a title 'Verify your email' and a subtitle 'Enter the 6-digit code sent to tawkirazirahman@gmail.com.' Below this is a green message box that says 'Verification code sent. Please check your email.' Underneath is a row of six input boxes for a 6-digit code, with the first five containing the digits '3', '2', '7', '2', and '2'. Below the code boxes are two buttons: a blue 'Verify code' button and a white 'Resend code' button.

5. Set a new password. Must be at least 12 characters with uppercase, lowercase, digits & special characters.

The screenshot shows the 'Set a new password' form on the AmarVote website. The form is centered on a light blue background. At the top, the AmarVote logo is on the left, and 'Log in' and 'Register' buttons are on the right. The form has a title 'Set a new password' and a subtitle 'Create your new password and sign in again.' Below this are two password input fields: 'New password' and 'Confirm new password', each with a toggle icon on the right. Between the two fields is a note: 'Password must be at least 12 characters and include uppercase, lowercase, digits, and special characters.' At the bottom of the form is a blue 'Set new password' button.

Finding an Election

From the Dashboard you have three ways to reach an election:

- **Ongoing elections** are shown directly on the Dashboard — just click one to enter.
- Use the **search bar** to find an election by name.
- Open the **menu** (top-left hamburger icon) and select "All Elections" to browse the complete list.

Once you choose an election, you land on its home page with details and a tabbed interface.

Casting Your Ballot

Enter the Voting Booth

Click the **"Voting Booth"** tab, then scroll down to see all candidates. Select your choices (you may vote for up to (n) candidates as specified).

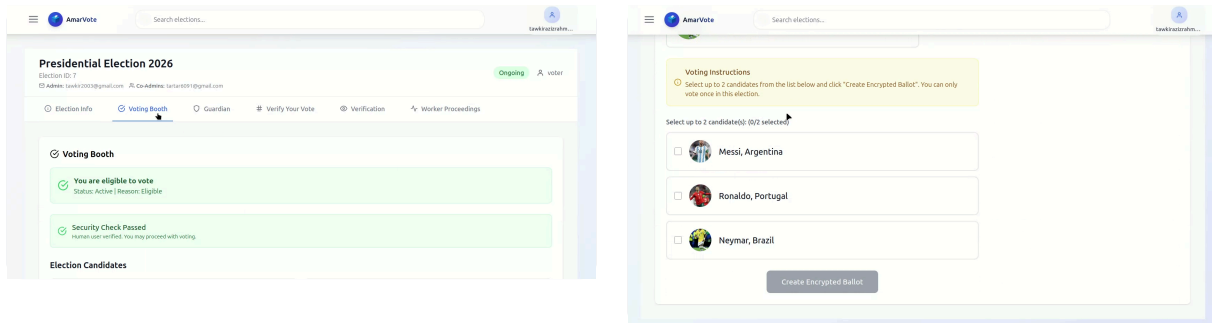

Figure 2: Voting Booth tab and candidate selection

Create an Encrypted Ballot

Once you have made your selections, click **"Create Encrypted Ballot"**. The system will produce an encrypted version of your choices.

Voting Instructions

Select up to 2 candidates from the list below and click "Create Encrypted Ballot". You can only vote once in this election.

Select up to 2 candidate(s): (2/2 selected)

☐		Messi, Argentina
☒		Ronaldo, Portugal
☒		Neymar, Brazil

Create Encrypted Ballot

After creation you are presented with three options:

- **Cast** – officially submit your ballot.
- **Challenge** – test the encryption by comparing it with your choices.
- **Discard** – throw the ballot away and start over.

Encrypted Ballot Ready ✕

Your vote has been encrypted. Cast your ballot, verify it with a challenge, or discard it and start over.

📄 Ballot

🔑 With Nonce

ℹ️ Info

✓ Cast Vote

🛡️ Challenge Vote

🗑️ Discard Ballot

During periods of high traffic, casting your vote or verifying your ballot may take a little longer than usual. Please remain on this page and allow the process to complete.

Challenge the Ballot (Optional Verification)

Challenging a ballot lets you verify that the encryption truly contains your selections — without ever casting it. You can challenge any number of times; each challenged ballot is discarded and cannot be cast.

💡 You must return to the Voting Booth and create a new encrypted ballot if you wish to eventually cast a vote.

Correct Challenge (choices match the encrypted ballot):

Figure 3: Same choices → encryption matches ✓

Wrong Challenge (different choices from the encrypted ballot):

Figure 4: Different choices → encryption does not match ✗

Casting the Ballot

When you are ready to vote, create a fresh encrypted ballot and then choose **"Cast"**. You will be shown a ballot receipt with a unique tracking code and the ballot hash.

Figure 5: Create → Cast → Receipt

Saving Your Receipt

After casting, you can download the receipt directly, and AmarVote will also email it to you. Keep this receipt — you will use it later to verify that your ballot is present in the final tally.

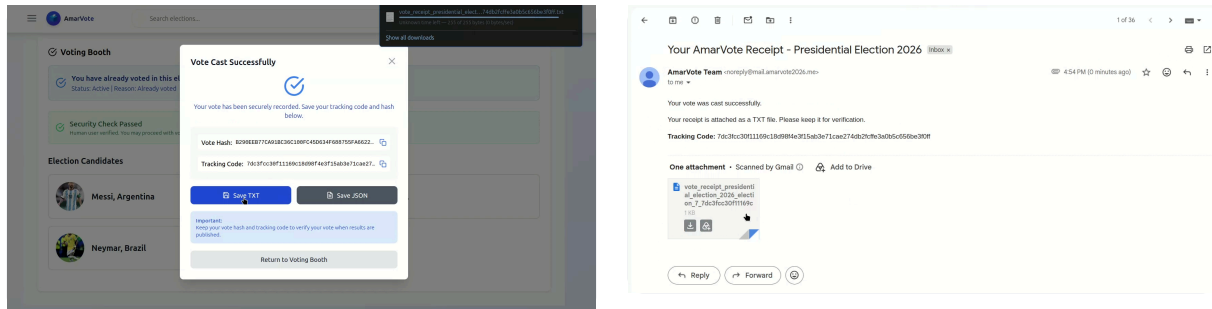

Figure 6: Download receipt and email copy

After the Election

Once voting ends and the results are decrypted, you can view them under the **"Result"** tab of the election. Scroll down to see detailed charts for each candidate.

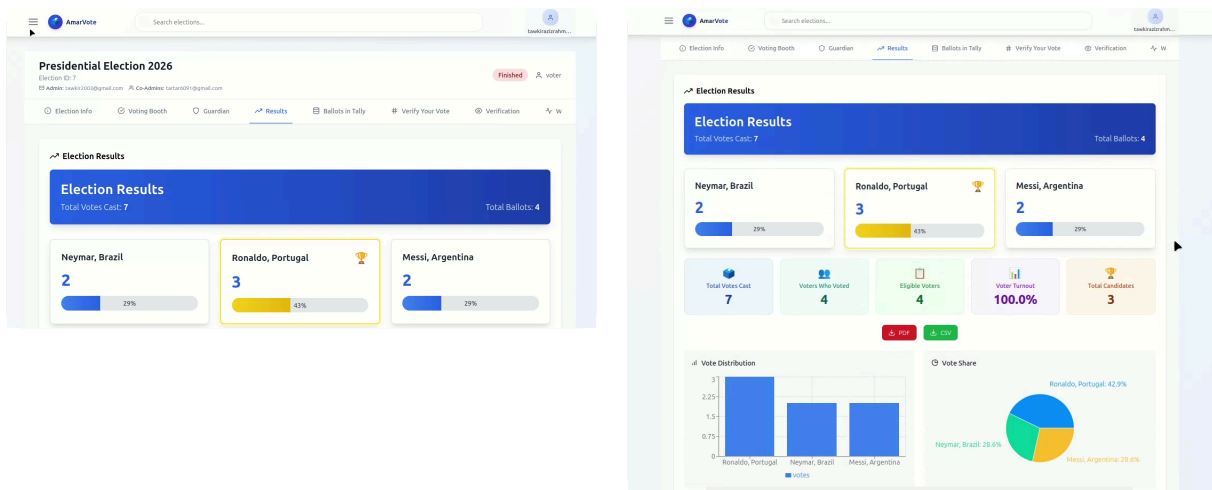

Figure 7: Results overview and detailed charts

Verify Your Ballot

Head to the **"Verify Your Vote"** tab and upload the receipt you saved. The system will match your tracking code with a ballot in the tally and compute the same ballot hash — confirming your vote was counted exactly as cast.

How to Verify Your Vote

Use either method below to verify that your vote was counted correctly in the final tally. You need both your tracking code and hash code from your vote receipt.

Upload Your Vote Receipt

Drag and drop your vote receipt file here (.txt or .json), or click to browse

Choose File

Understanding Verification Results

Verified: Your vote was found and the hash matches perfectly. Your vote was counted correctly.

Hash Mismatch: Vote found but hash doesn't match. This may indicate tampering or data corruption.

Not Found: Your tracking code was not found in the final tally. Your vote may not have been counted.

Vote Verified Successfully! ✓

Your vote was found and verified in the tally. Both tracking code and hash match perfectly.

Verification Details

Tracking Code: 7dc3fcc30f11169c18d98f4e3f15ab3e71cae274db2fcffe3a0b5c656be3f0ff

Hash Code: B290EEB77CA91BC36C106FC45D634F688755FA66229E8D211EAE64C6DBC9A657

Found in Tally: ✓ Yes

Ballot Status: cast

Understanding Verification Results

Verified: Your vote was found and the hash matches perfectly. Your vote was counted correctly.

Hash Mismatch: Vote found but hash doesn't match. This may indicate tampering or data corruption.

Not Found: Your tracking code was not found in the final tally. Your vote may not have been counted.

Note: This verification system provides cryptographic proof that your vote was counted correctly. The verification is performed against the official election tally and cannot be tampered with.

Browse All Cast Ballots

The **“Ballots in Tally”** tab shows every encrypted ballot that is part of the final result. You can manually search for your tracking code and verify that the corresponding ballot hash matches your receipt.
