System Release: v1.0

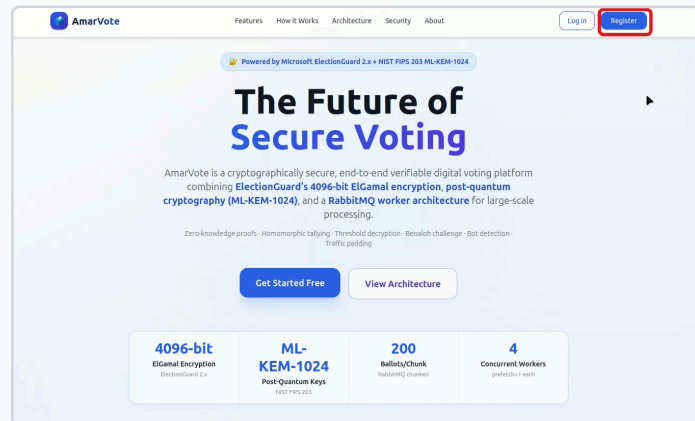

SECURITY FRAMEWORK

Encryption: E2E Standard
Audit State: Independent Verified

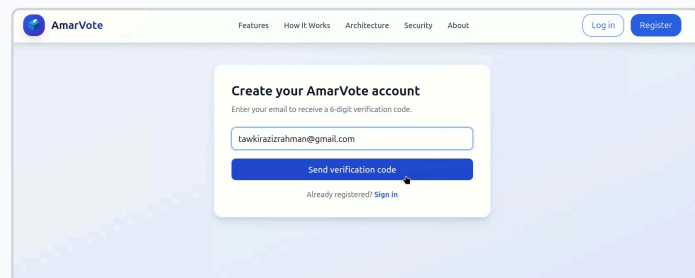

Welcome to the AmarVote Voter Manual. This guide provides a highly concise, visual walkthrough to help you complete your voting process quickly and securely.

1. Registration

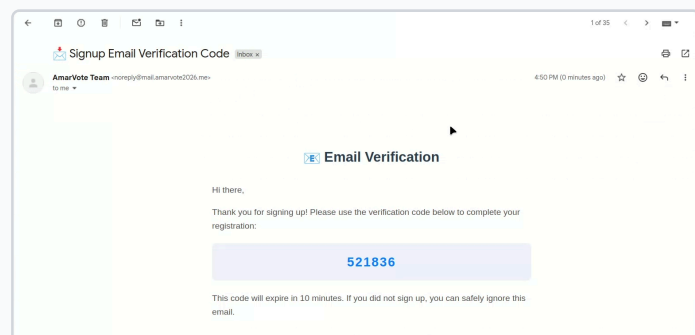

Go to the registration page by clicking the **Register** button on the home page.

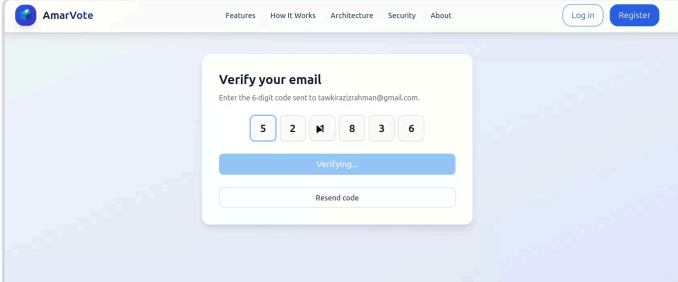

Create your account by verifying your email. Please enter the email officially listed in the voter list, as we only allow entry to officially enlisted users.

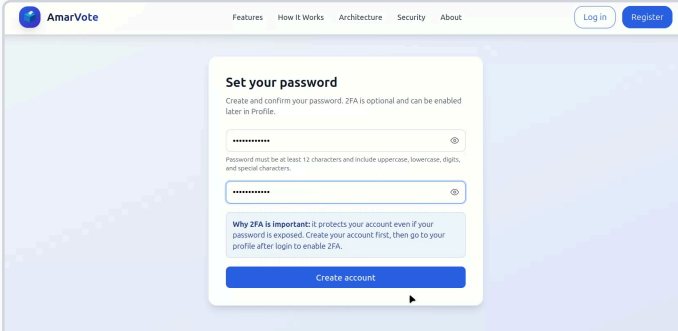

AmarVote will send a 6-digit verification code to your email account.

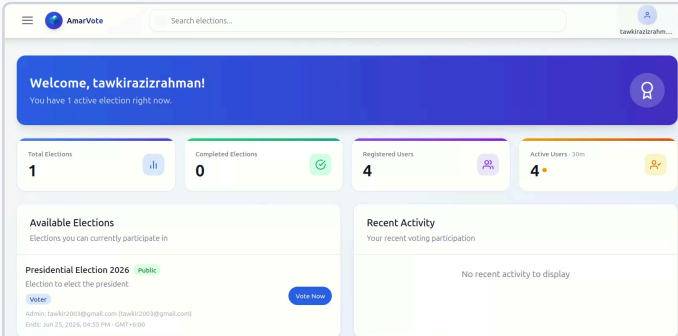

Enter the received verification code in the system.

The screenshot shows the 'Verify your email' page on the AmarVote website. At the top, there's a navigation bar with the AmarVote logo and links for Features, How It Works, Architecture, Security, and About. On the right are 'Log in' and 'Register' buttons. The main content area has a white card with the title 'Verify your email' and a subtitle 'Enter the 6-digit code sent to tawkirazrahman@gmail.com.' Below this is a row of six input boxes containing the digits 5, 2, 1, 8, 3, and 6. Underneath the digits is a blue 'Verifying...' button and a 'Resend code' button.

Set a strong password for your account. It must be at least 12 characters long and contain uppercase, lowercase, digits, and special characters.

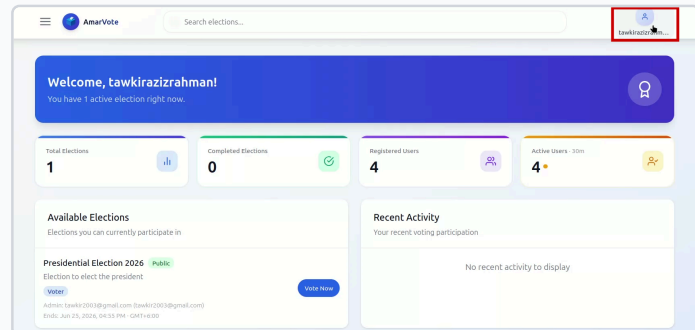

The screenshot shows the 'Set your password' page on the AmarVote website. The navigation bar is the same as the previous screen. The main content area has a white card with the title 'Set your password' and a subtitle 'Create and confirm your password. 2FA is optional and can be enabled later in Profile.' There are two password input fields, each with a strength indicator icon. Below the fields, a note states: 'Password must be at least 12 characters and include uppercase, lowercase, digits, and special characters.' A blue box explains 'Why 2FA is important: It protects your account even if your password is exposed. Create your account first, then go to your profile after login to enable 2FA.' At the bottom is a blue 'Create account' button.

Once done, you are securely logged into your account dashboard.

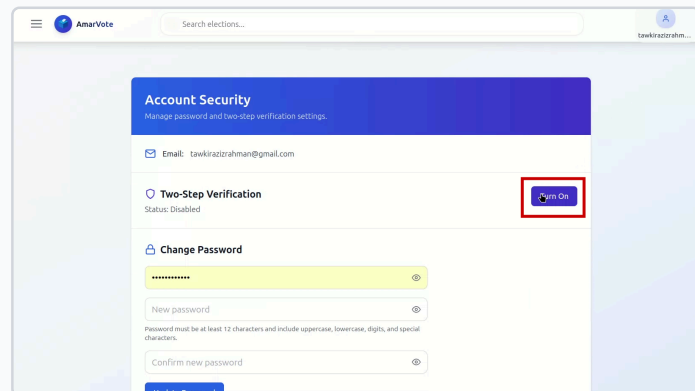

The screenshot shows the user's account dashboard on the AmarVote website. The navigation bar includes a search bar and the user's name 'tawkirazrahman...'. The dashboard has a blue header with 'Welcome, tawkirazrahman!' and 'You have 1 active election right now.' Below this are four statistics cards: 'Total Elections' (1), 'Completed Elections' (0), 'Registered Users' (4), and 'Active Users - 30m' (4). There are two main sections: 'Available Elections' and 'Recent Activity'. The 'Available Elections' section lists the 'Presidential Election 2026' as a public election with a 'Vote' button. The 'Recent Activity' section shows 'No recent activity to display'.

2. Two-Factor Authentication (Optional)

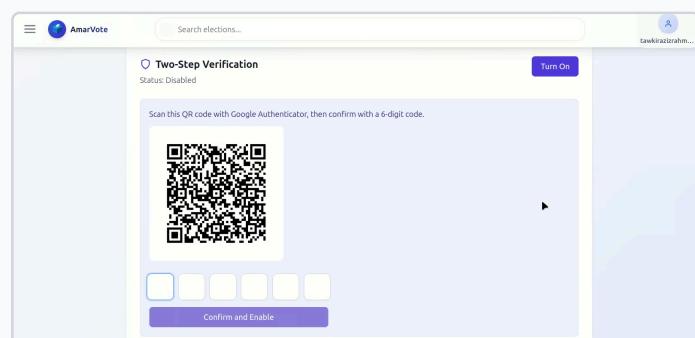

To optionally enable two-factor authentication (2FA) for extra security, click your **Profile** button which is the button in the top right corner with your email address

Click **Turn On** in the two step verification field.

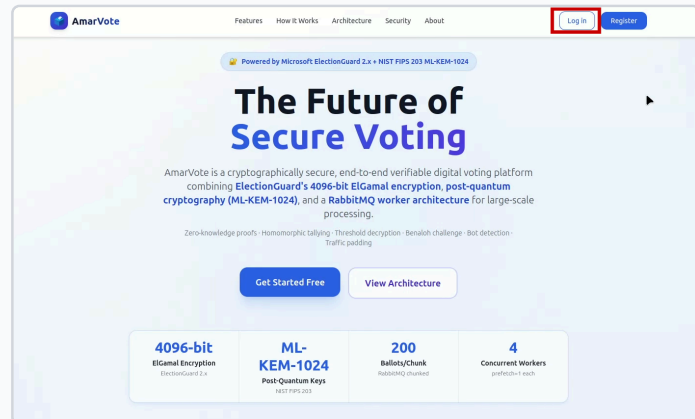

Scan the QR code with your authenticator app and enter the generated code. Your 2FA is now enabled.

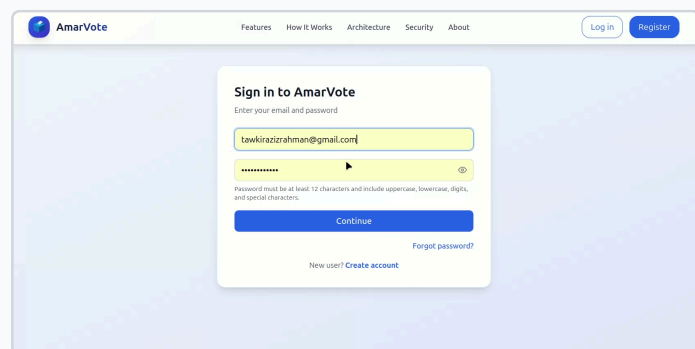

3. Logging In

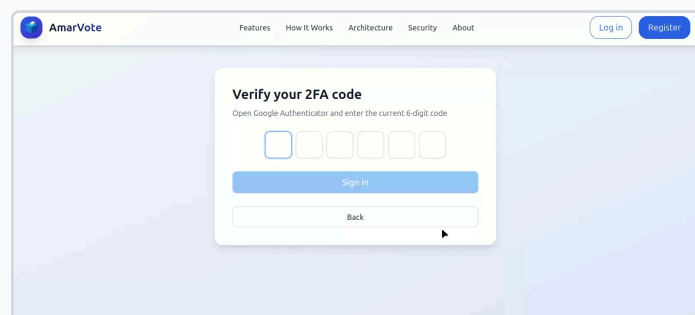

When returning, go to the log in window by clicking the **Log In** button on the home page.

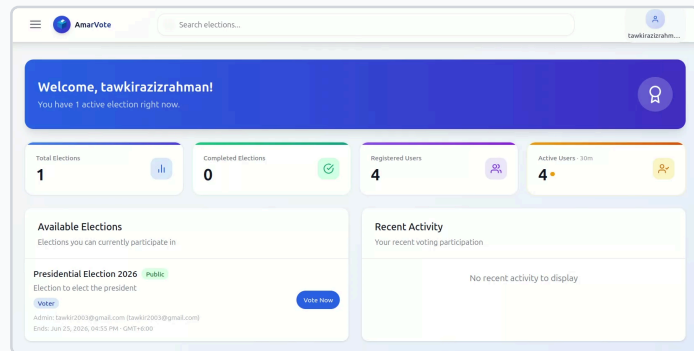

Enter your registered email and password.

If you have 2FA enabled, enter the code from your authenticator app.

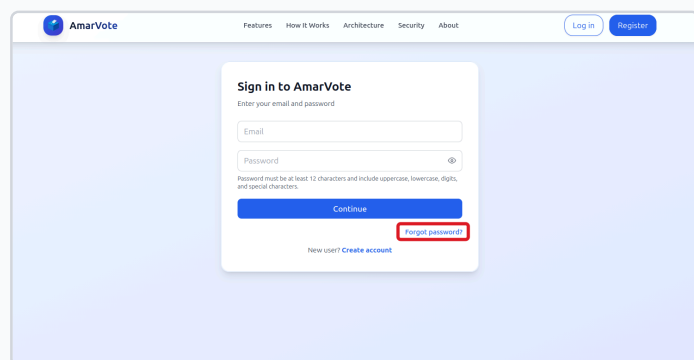

You are now in your account and can view the dashboard.

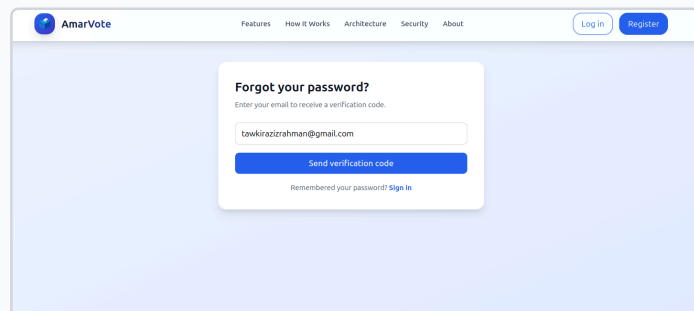

Forgot Your Password

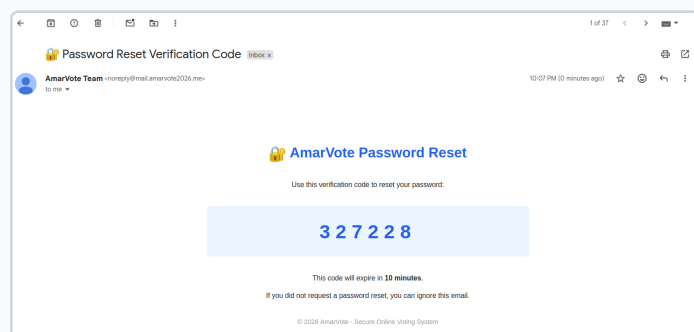

If you forgot your password, click the **Forgot Password?** option on the login page.

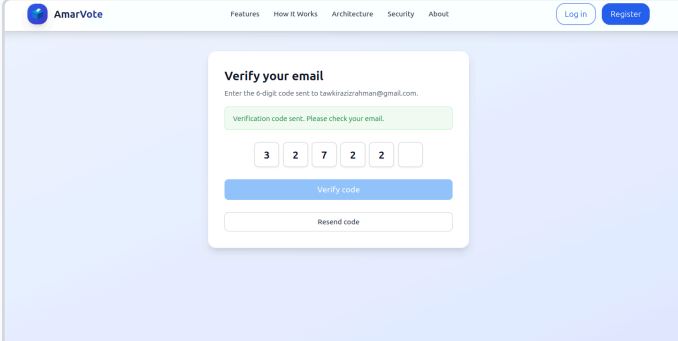

Enter the email address that was registered with your account.

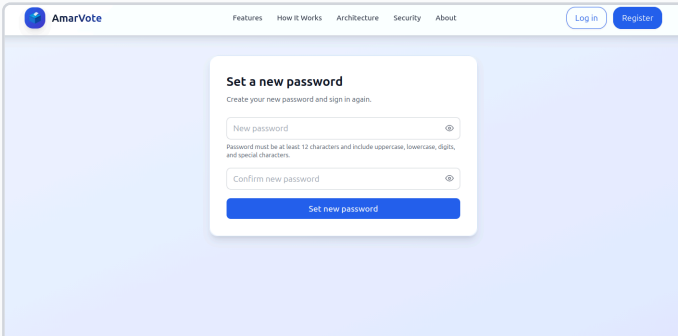

AmarVote will send a six-digit code to your email.

Enter the six-digit code you received.

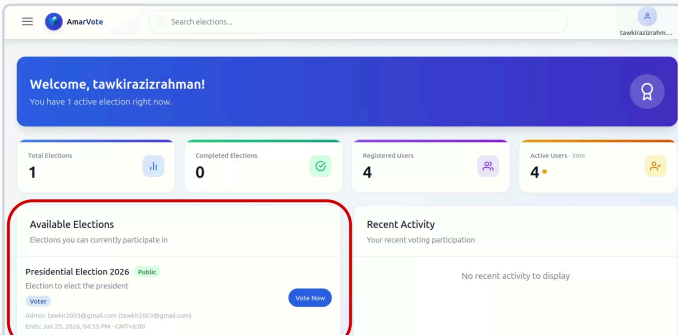

The screenshot shows the 'Verify your email' page on the AmarVote website. The page has a light blue background. At the top, there is a navigation bar with the AmarVote logo, links for Features, How it Works, Architecture, Security, and About, and buttons for Log in and Register. The main content area is a white card with the title 'Verify your email'. Below the title, it says 'Enter the 6-digit code sent to tawkirazrahman@gmail.com.' and 'Verification code sent. Please check your email.' There are six input fields for the code, with the first four containing the digits 3, 2, 7, and 2. Below the input fields are two buttons: 'Verify code' and 'Resend code'.

Set a new password. It must be at least 12 characters and include uppercase, lowercase, digits, and special characters.

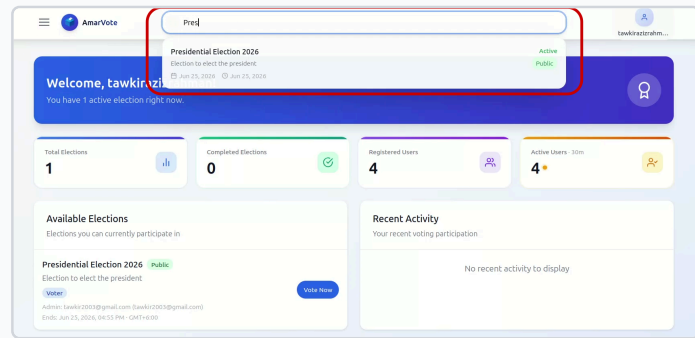

The screenshot shows the 'Set a new password' page on the AmarVote website. The page has a light blue background. At the top, there is a navigation bar with the AmarVote logo, links for Features, How it Works, Architecture, Security, and About, and buttons for Log in and Register. The main content area is a white card with the title 'Set a new password'. Below the title, it says 'Create your new password and sign in again.' There are two input fields: 'New password' and 'Confirm new password'. Below the input fields is a button labeled 'Set new password'.

4. Finding Elections

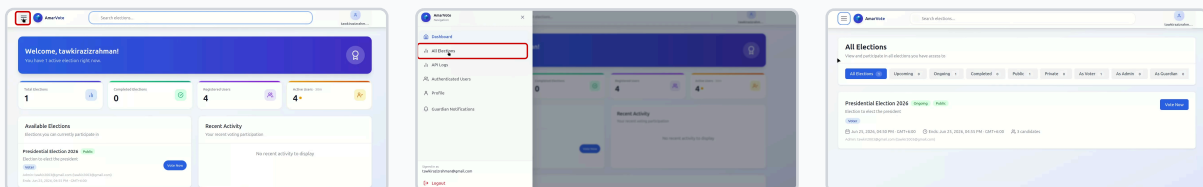

You can see ongoing elections directly on the dashboard and click them to vote.

The screenshot shows the AmarVote dashboard for a user named tawkirazrahman. The dashboard has a dark blue header with the AmarVote logo, a search bar, and the user's name. Below the header, there is a 'Welcome, tawkirazrahman!' message and a notification 'You have 1 active election right now.' The dashboard is divided into several sections. On the left, there are four statistics: 'Total Elections' (1), 'Completed Elections' (0), 'Registered Users' (4), and 'Active Users - 30m' (4). On the right, there is a 'Recent Activity' section with the text 'Your recent voting participation' and 'No recent activity to display'. At the bottom, there is an 'Available Elections' section with the text 'Elections you can currently participate in'. It lists a 'Presidential Election 2026' with a 'Public' tag and a 'Vote' button. The 'Vote' button is highlighted with a red box.

Alternatively, use the top search bar to find an election by name.

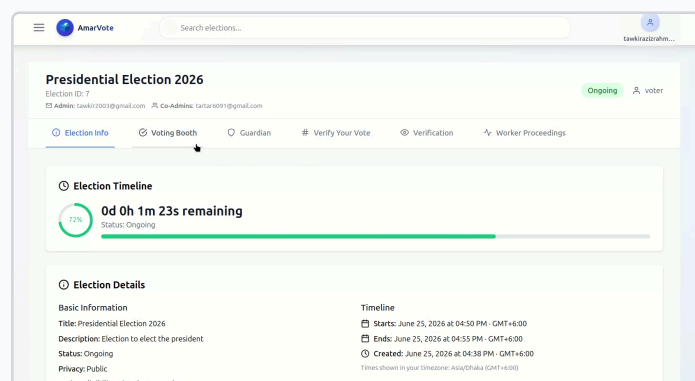

You can also browse all elections by clicking the top-left **Menu** (hamburger) button, selecting **All Elections**, and clicking the election you want.

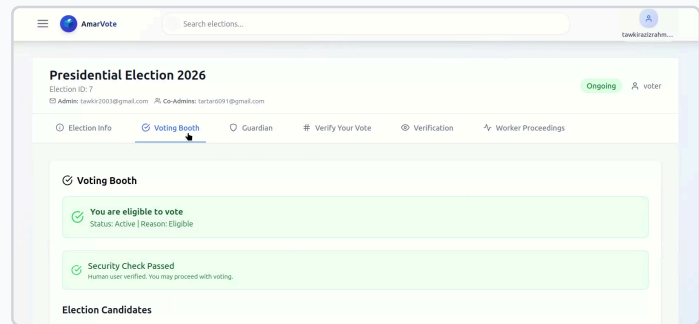

5. Casting Your Vote

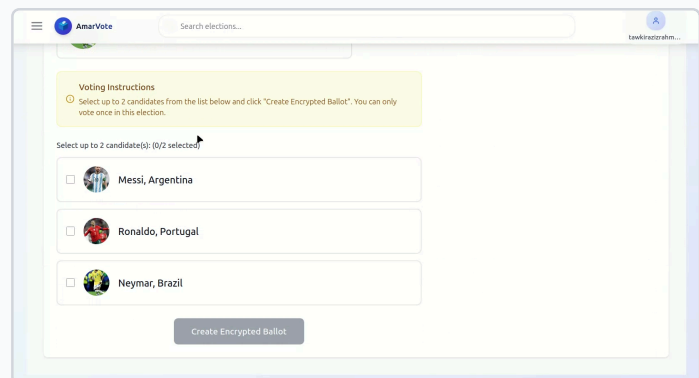

On the election home page, review the information.

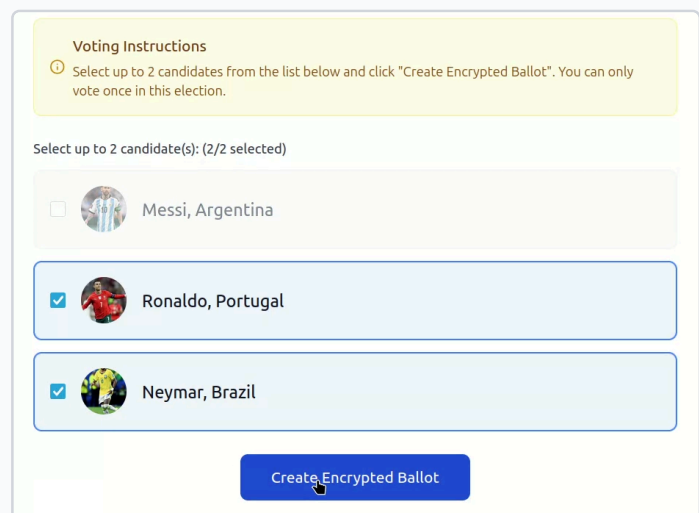

Navigate to the voting booth on the top tabs.

Scroll down to select your preferred candidates (up to the allowed number).

Click **Create Encrypted Ballot** to secure your choices.

After creating an encrypted ballot, you have three options: **Cast** it, **Challenge** it, or **Discard** it.

Encrypted Ballot Ready

Your vote has been encrypted. Cast your ballot, verify it with a challenge, or discard it and start over.

Cast Vote

Challenge Vote

Discard Ballot

During periods of high traffic, casting your vote or verifying your ballot may take a little longer than usual. Please remain on this page and allow the process to complete.

If you challenge with the **same** choices you used to create the ballot, it will show a match.

Voting Instructions

Select up to 2 candidates from the list below and click "Create Encrypted Ballot". You can only vote once in this election.

Select up to 2 candidate(s): (2/2 selected)

☐ Messi, Argentina

☒ Ronaldo, Portugal

☒ Neymar, Brazil

Create Encrypted Ballot

Challenge Ballot Verification

Select the candidate(s) you voted for to verify against your encrypted ballot.

☐ Messi, Argentina

☒ Ronaldo, Portugal

☒ Neymar, Brazil

Important: After challenging, this ballot cannot be cast. Challenge is for verification only.

Cancel Challenge Ballot

Challenge Passed

Challenge Verification Passed

✓ Ballot verification successful! The encrypted ballot was created with your selected choice: Neymar, Brazil, Ronaldo, Portugal

Return to Voting Booth

If you select **different** choices, it will show a mismatch.

Note: A challenged ballot is discarded regardless of the result. You can create and challenge unlimited times, but to cast a vote, you must return to the booth and create a new encrypted ballot.

Voting Instructions

Select up to 2 candidates from the list below and click "Create Encrypted Ballot". You can only vote once in this election.

Select up to 2 candidate(s): (2/2 selected)

☐ Messi, Argentina

☒ Ronaldo, Portugal

☒ Neymar, Brazil

Create Encrypted Ballot

Challenge Ballot Verification

Select the candidate(s) you voted for to verify against your encrypted ballot.

☒ Messi, Argentina

☒ Ronaldo, Portugal

☐ Neymar, Brazil

Important: After challenging, this ballot cannot be cast. Challenge is for verification only.

Cancel Challenge Ballot

Challenge Failed

Challenge Verification Failed

✗ **WARNING:** Ballot verification failed! The encrypted ballot does NOT match your selected choice. This indicates a potential security issue. Please contact the election administrators immediately.

Return to Voting Booth

Casting Your Ballot

To finalize your vote, create a new encrypted ballot and click **Cast Vote**.

Vote Cast Successfully

Your vote has been securely recorded. Save your tracking code and hash below.

Vote Hash: B298EB77CA91BC36C189FC45D634F688755FA6622...

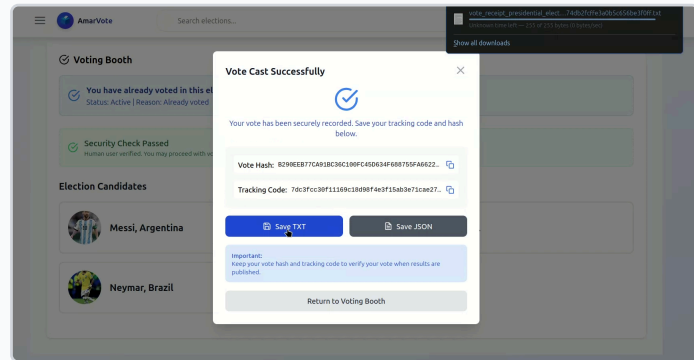

Tracking Code: 7dc3fcc38f1169c18d98F4e3f15ab3e71cae27...

Save TXT Save JSON

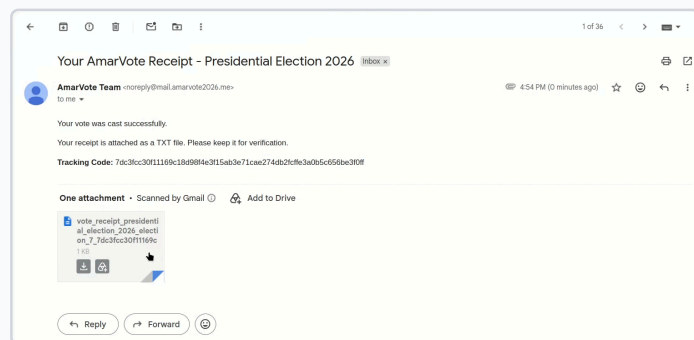

Important: Keep your vote hash and tracking code to verify your vote when results are published.

Return to Voting Booth

After successfully casting, you will receive a tracking code and ballot hash. Download and save it to verify your vote later.

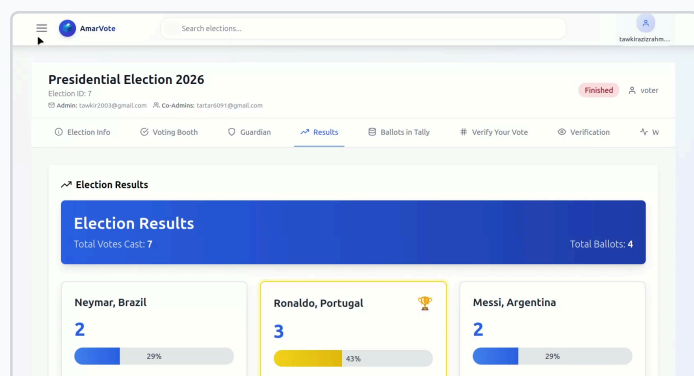

AmarVote will also send a ballot receipt to your email for your records.

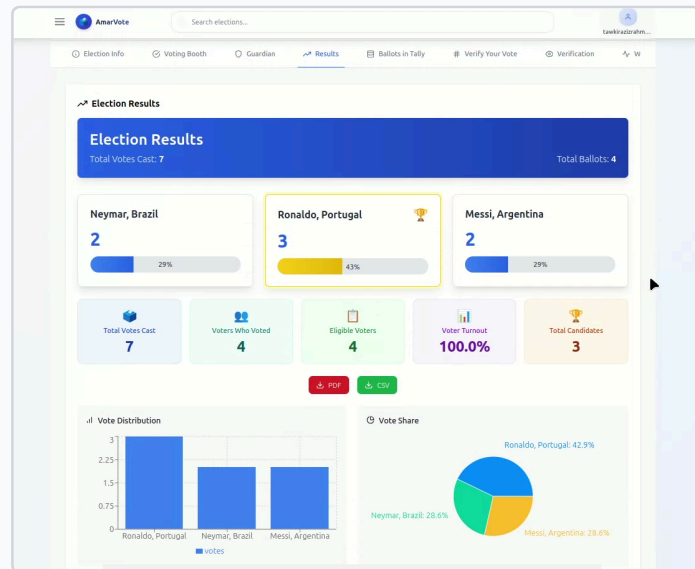

6. Results & Verification

After the election ends and results are fully decrypted, view them in the **Result** tab.

Scroll down to see detailed charts and candidate metrics.

Head to the **Verify your vote** tab and upload your receipt to ensure your vote was counted properly.

The screenshot shows the 'Verify Your Vote' page. It includes the following elements:

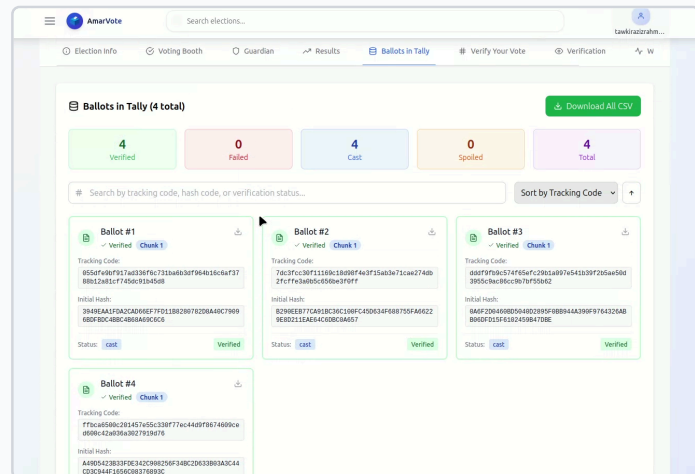

- Page Header:** Presidential Election 2026, Election ID: 7, Admin: tawki2003@gmail.com, Co-Admin: tarzan691@gmail.com.
- Navigation:** Election Info, Voting Booth, Guardian, Results, Ballots in Tally, # Verify Your Vote (active), Verification.
- Verification Options:** Upload File, Manual Entry.
- How to Verify Your Vote:** Use either method below to verify that your vote was counted correctly in the final tally. You need both your tracking code and hash code from your vote receipt.
- Upload Your Vote Receipt:** Drag and drop your vote receipt file here (.txt or .json), or click to browse. A 'Choose File' button is present.
- Understanding Verification Results:**
 - Verified:** Your vote was found and the hash matches perfectly. Your vote was counted correctly.
 - Hash Mismatch:** Vote found but hash doesn't match. This may indicate tampering or data corruption.
 - Not Found:** Your tracking code was not found in the final tally. Your vote may not have been counted.

Your receipt will be matched with the tally, confirming the tracking code and ballot hash match.

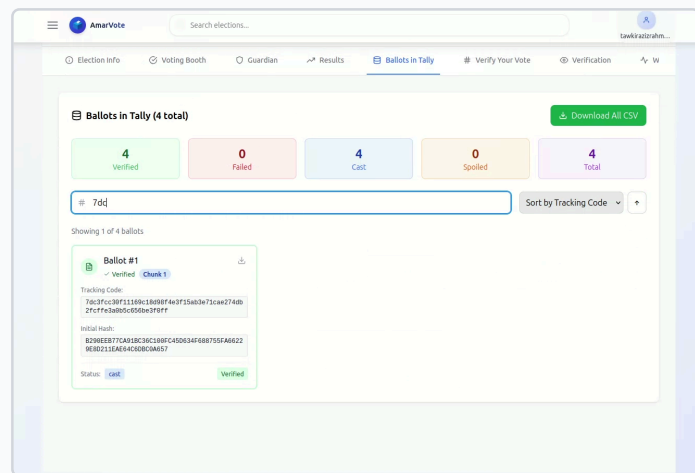

The screenshot shows the 'Vote Verified Successfully!' page. It includes the following elements:

- Success Message:** Your vote was found and verified in the tally. Both tracking code and hash match perfectly.
- Verification Details:**
 - Tracking Code: 78cFfc30f113b1c18b9f4e3f15ab3e71cae274db2fc7f43a8dc550be3f8ff
 - Hash Code: B2WKEEB77CAB38C38C190FC45D634F688755FAA229E8D211EAD64C6D8C8A657
 - Found in Tally: Yes
 - Ballot Status: cast
- Understanding Verification Results:**
 - Verified:** Your vote was found and the hash matches perfectly. Your vote was counted correctly.
 - Hash Mismatch:** Vote found but hash doesn't match. This may indicate tampering or data corruption.
 - Not Found:** Your tracking code was not found in the final tally. Your vote may not have been counted.
- Note:** This verification system provides cryptographic proof that your vote was counted correctly. The verification is performed against the official election tally and cannot be tampered with.

You can also go to the **Ballots in Tally** tab to see the public ledger of all ballots.

Alternatively, manually search by your tracking code to verify your ballot's presence and hash match in the tally.

Thank you for using AmarVote. Your vote is secure, private, and verifiable.
