Registration

AmarVote is open only to officially enlisted voters. Your registration uses the email address registered with the election authority.

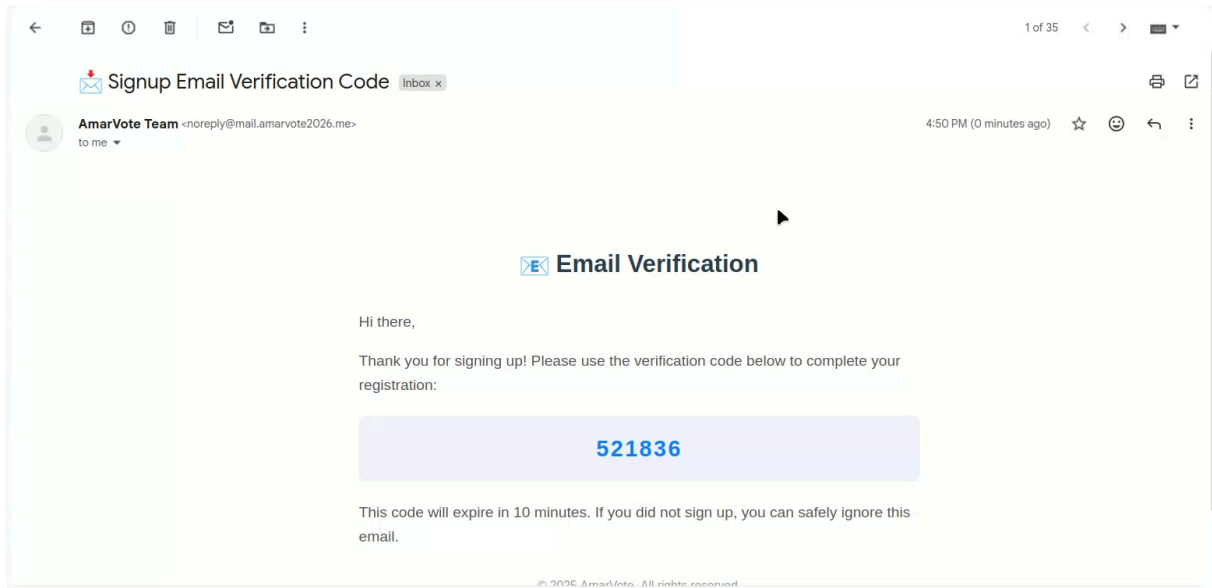

1. From the Home Page, click **"Register"**.

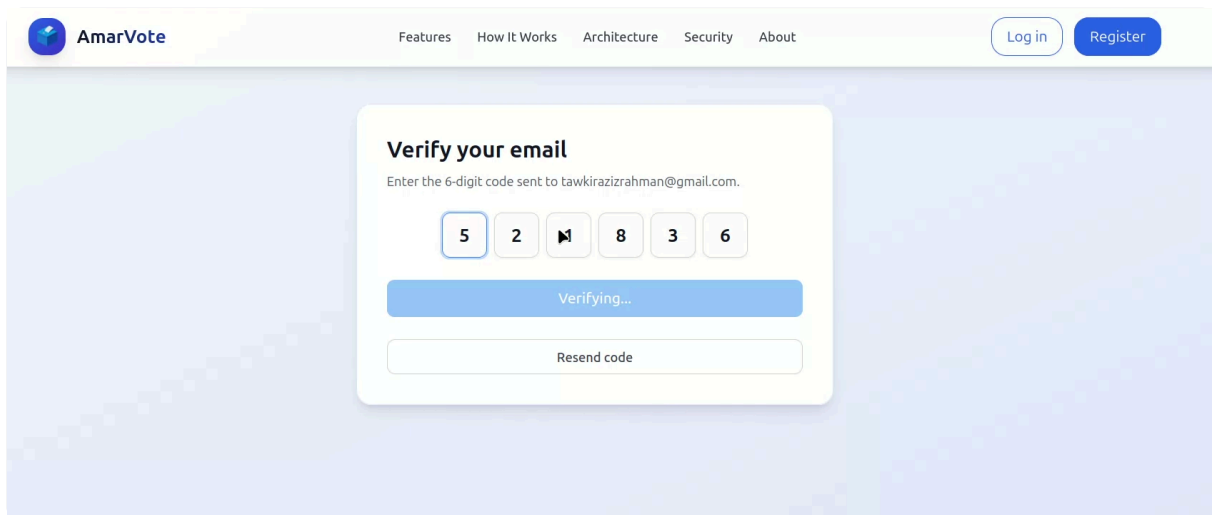

2. Enter the email that is on your voter list, then click **"Send Verification Code"**.

3. AmarVote will send a 6-digit verification code to that email.

4. Input the code on the next screen.

5. You will now be asked to set a strong password. Must be at least 12 characters with uppercase, lowercase, digits & special characters.

The image shows the AmarVote registration page. At the top, there is a navigation bar with the AmarVote logo, links for Features, How It Works, Architecture, Security, and About, and buttons for Log in and Register. The main content area is titled 'Set your password'. It includes instructions to create and confirm a password, with a note that 2FA is optional and can be enabled later. There are two password input fields, each with a strength indicator and a toggle for visibility. A message explains that the password must be at least 12 characters and include uppercase, lowercase, digits, and special characters. Below the fields is a 'Why 2FA is important' section and a 'Create account' button.

Set your password

Create and confirm your password. 2FA is optional and can be enabled later in Profile.

Password must be at least 12 characters and include uppercase, lowercase, digits, and special characters.

Why 2FA is important: it protects your account even if your password is exposed. Create your account first, then go to your profile after login to enable 2FA.

Create account

6. Once the password is set, you are taken to your Dashboard — registration complete!

The image shows the AmarVote user dashboard for the user 'tawkirazizrahman'. The top navigation bar includes a search bar for elections and a user profile icon. The dashboard features a welcome message, a summary of election statistics, and sections for available elections and recent activity.

Welcome, tawkirazizrahman!
You have 1 active election right now.

💡 Keep your password safe.

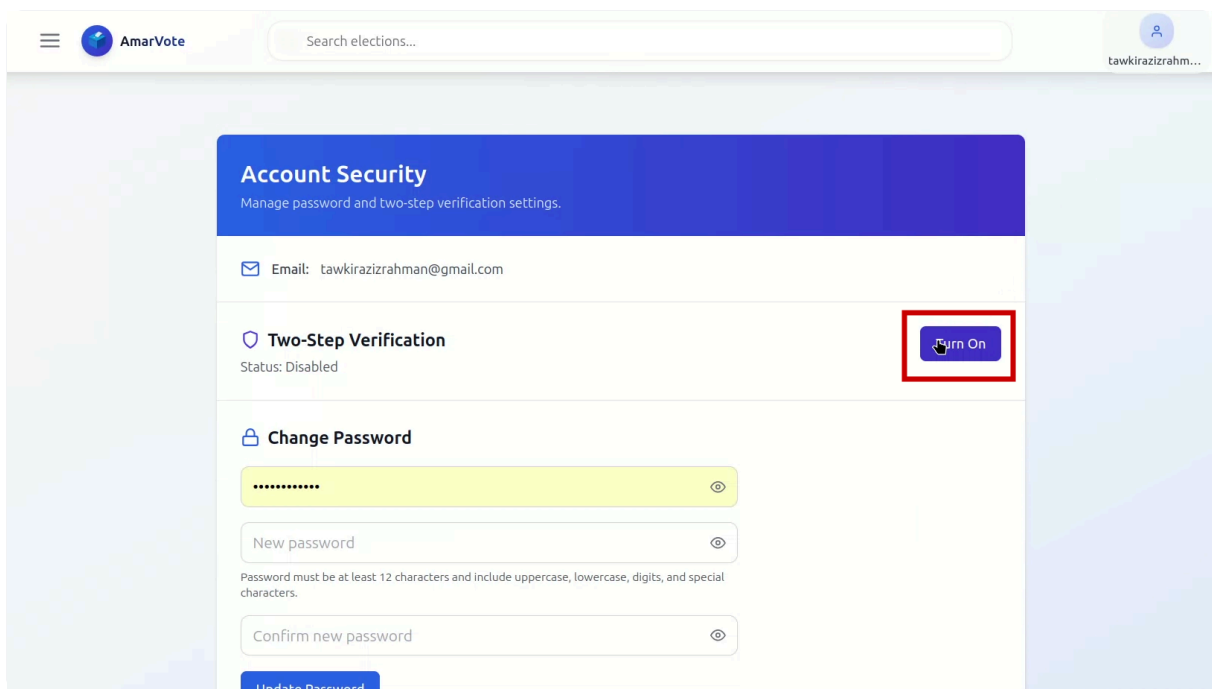

Two-Factor Authentication (Optional)

Enabling two-step verification adds an extra layer of security to your account.

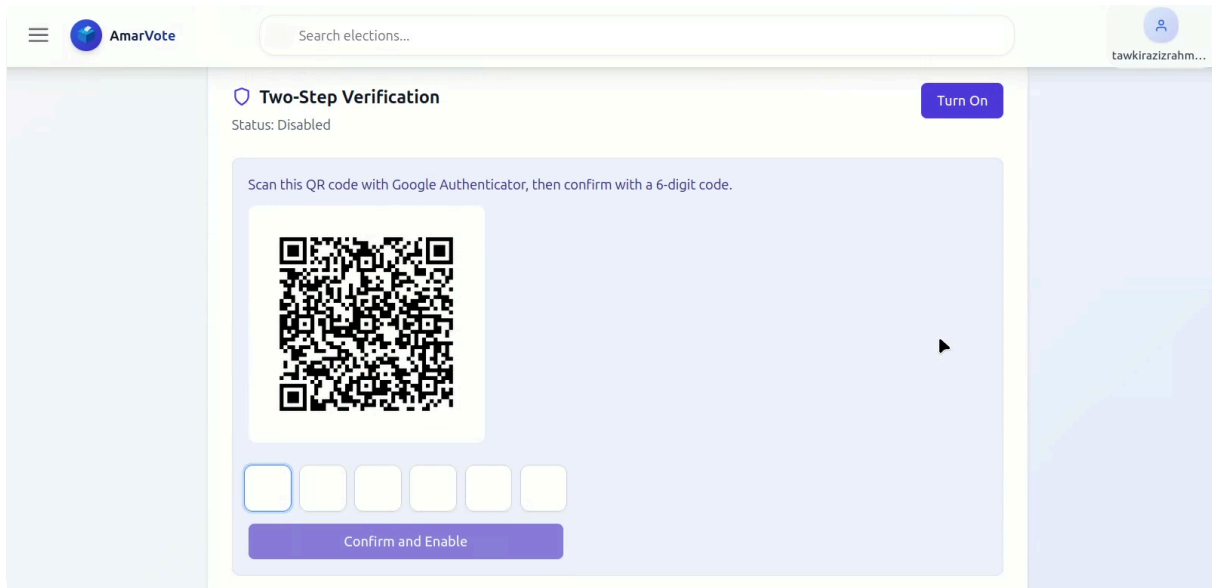

1. On the Dashboard, click the **Profile button** in the top-right corner.

2. In the profile panel, locate “Two-Step Authentication” and click “Turn On”.

3. Scan the QR code with an authenticator app (e.g., Google Authenticator, Authy) and enter the code it displays.

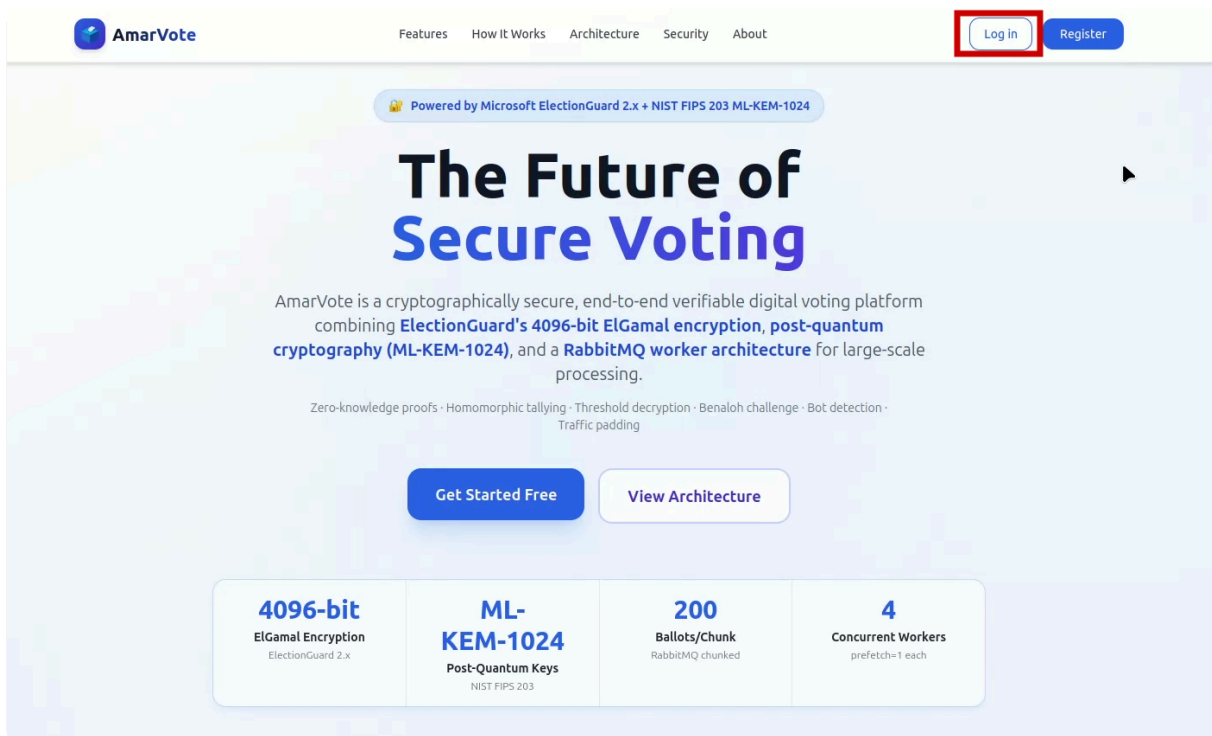

From now on, every login will require a code from your authenticator app.

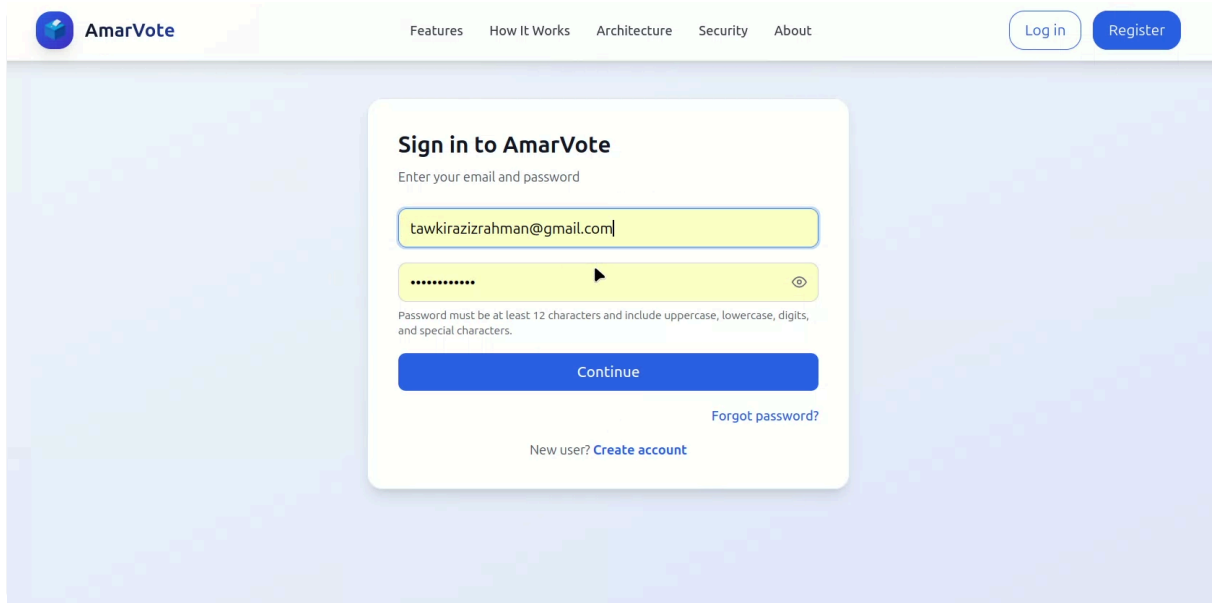

Signing In

When you return to AmarVote, use the Home Page to log in.

1. Click the **“Log In”** button on the Home Page.

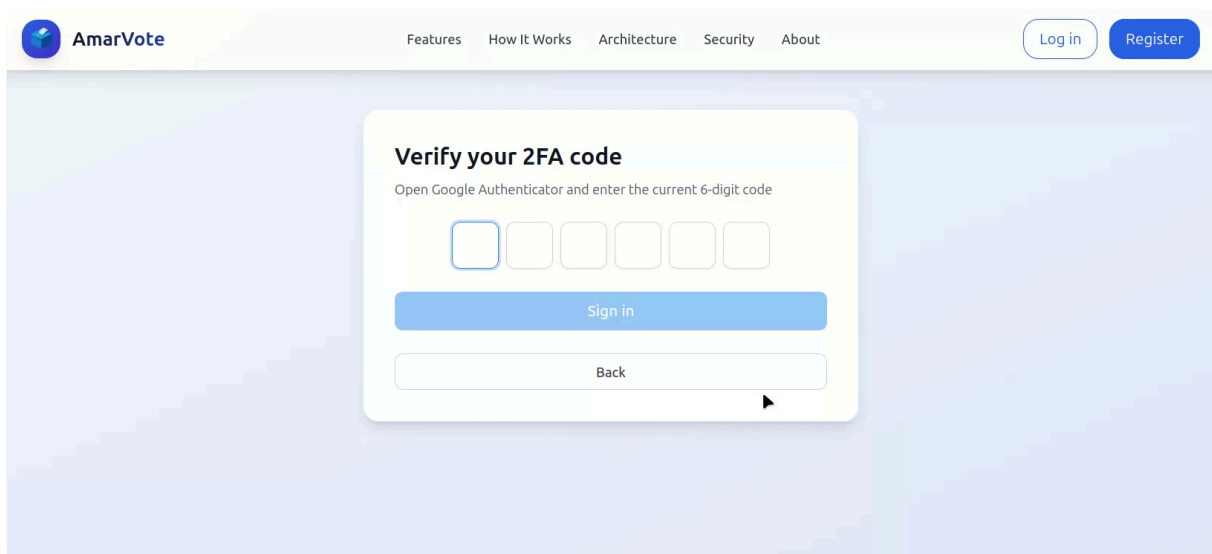

2. Enter your email and password.

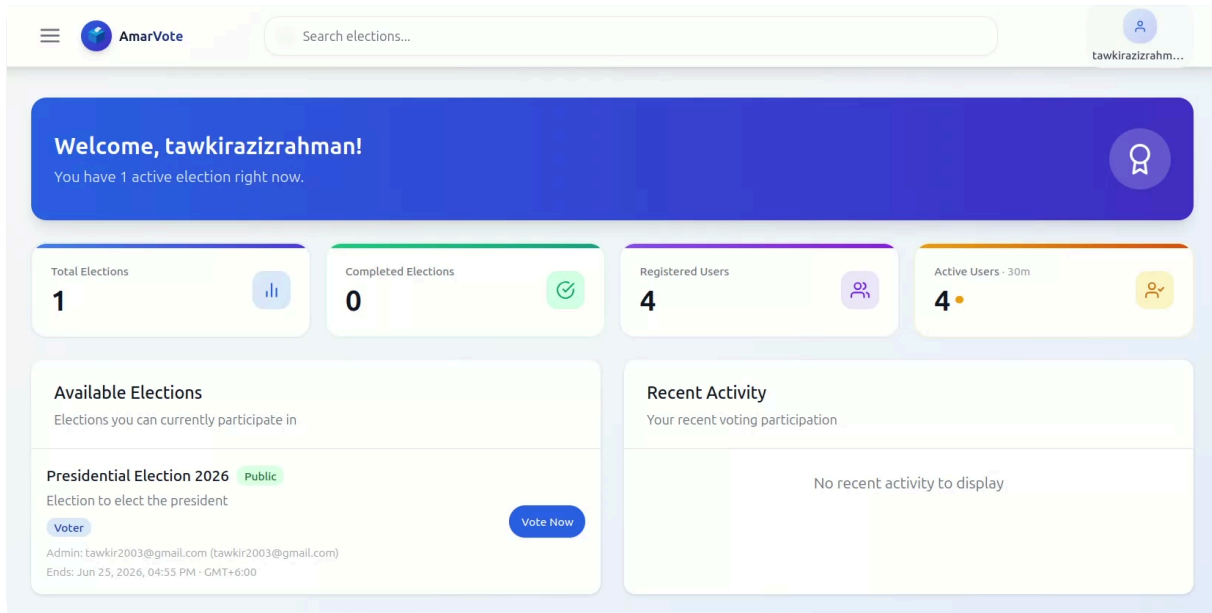

The screenshot shows the AmarVote login interface. At the top, there is a navigation bar with the AmarVote logo on the left and links for Features, How It Works, Architecture, Security, and About in the center. On the right side of the navigation bar are 'Log in' and 'Register' buttons. The main content area features a central white card titled 'Sign in to AmarVote'. Below the title, it says 'Enter your email and password'. There are two input fields: the first contains the email 'tawkirazirahman@gmail.com', and the second contains a masked password '*****'. Below the password field, a note states: 'Password must be at least 12 characters and include uppercase, lowercase, digits, and special characters.' There is a blue 'Continue' button, a link for 'Forgot password?', and a link for 'New user? Create account'.

3. If two-factor authentication is enabled, you will be prompted for a code. Enter the 6-digit code shown in your authenticator app.

The screenshot shows the AmarVote 2FA verification interface. At the top, there is a navigation bar with the AmarVote logo on the left and links for Features, How It Works, Architecture, Security, and About in the center. On the right side of the navigation bar are 'Log in' and 'Register' buttons. The main content area features a central white card titled 'Verify your 2FA code'. Below the title, it says 'Open Google Authenticator and enter the current 6-digit code'. There are six input boxes for the 6-digit code. Below the input boxes are two buttons: a blue 'Sign in' button and a white 'Back' button.

4. After successful login, you are back on your Dashboard, ready to vote.

Finding an Election

From the Dashboard you have three ways to reach an election:

- **Ongoing elections** are shown directly on the Dashboard — just click one to enter.
- Use the **search bar** to find an election by name.
- Open the **menu** (top-left hamburger icon) and select “All Elections” to browse the complete list.

Once you choose an election, you land on its home page with details and a tabbed interface.

Casting Your Ballot

Enter the Voting Booth

Click the **"Voting Booth"** tab, then scroll down to see all candidates. Select your choices (you may vote for up to (n) candidates as specified).

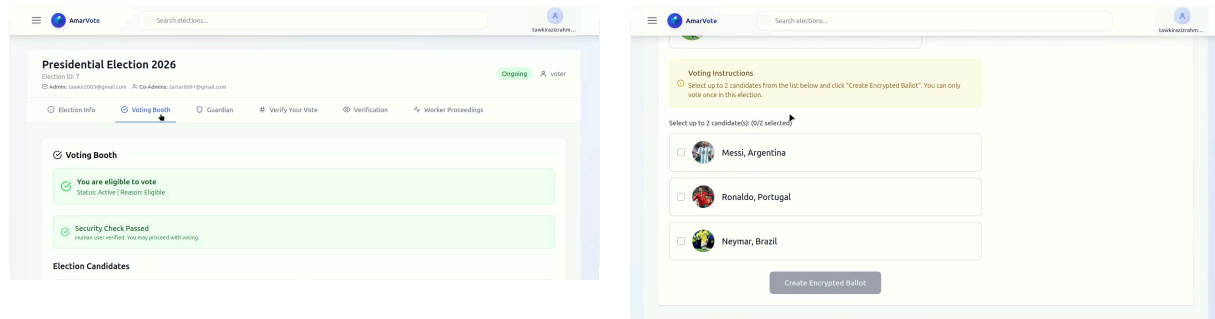

Figure 2: Voting Booth tab and candidate selection

Create an Encrypted Ballot

Once you have made your selections, click **"Create Encrypted Ballot"**. The system will produce an encrypted version of your choices.

Voting Instructions

-  Select up to 2 candidates from the list below and click "Create Encrypted Ballot". You can only vote once in this election.

Select up to 2 candidate(s): (2/2 selected)

Messi, Argentina

Ronaldo, Portugal

Neymar, Brazil

Create Encrypted Ballot

After creation you are presented with three options:

- **Cast** – officially submit your ballot.
- **Challenge** – test the encryption by comparing it with your choices.
- **Discard** – throw the ballot away and start over.

Encrypted Ballot Ready ✕

Your vote has been encrypted. Cast your ballot, verify it with a challenge, or discard it and start over.

📄 Ballot

🔑 With Nonce

ℹ️ Info

✓ Cast Vote

🛡️ Challenge Vote

🗑️ Discard Ballot

During periods of high traffic, casting your vote or verifying your ballot may take a little longer than usual. Please remain on this page and allow the process to complete.

Challenge the Ballot (Optional Verification)

Challenging a ballot lets you verify that the encryption truly contains your selections — without ever casting it. You can challenge any number of times; each challenged ballot is discarded and cannot be cast.

💡 You must return to the Voting Booth and create a new encrypted ballot if you wish to eventually cast a vote.

Correct Challenge (choices match the encrypted ballot):

Figure 3: Same choices → encryption matches ✓

Wrong Challenge (different choices from the encrypted ballot):

Figure 4: Different choices → encryption does not match ✗

Casting the Ballot

When you are ready to vote, create a fresh encrypted ballot and then choose **"Cast"**. You will be shown a ballot receipt with a unique tracking code and the ballot hash.

Figure 5: Create → Cast → Receipt

Saving Your Receipt

After casting, you can download the receipt directly, and AmarVote will also email it to you. Keep this receipt — you will use it later to verify that your ballot is present in the final tally.

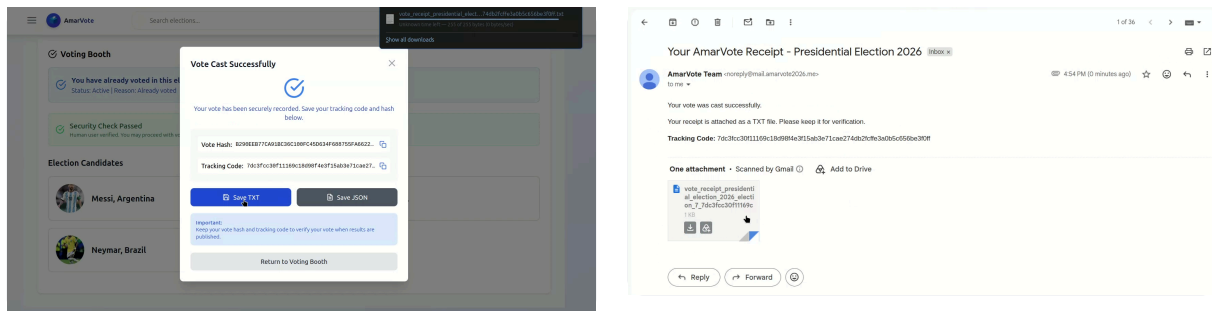

Figure 6: Download receipt and email copy

After the Election

Once voting ends and the results are decrypted, you can view them under the **"Result"** tab of the election. Scroll down to see detailed charts for each candidate.

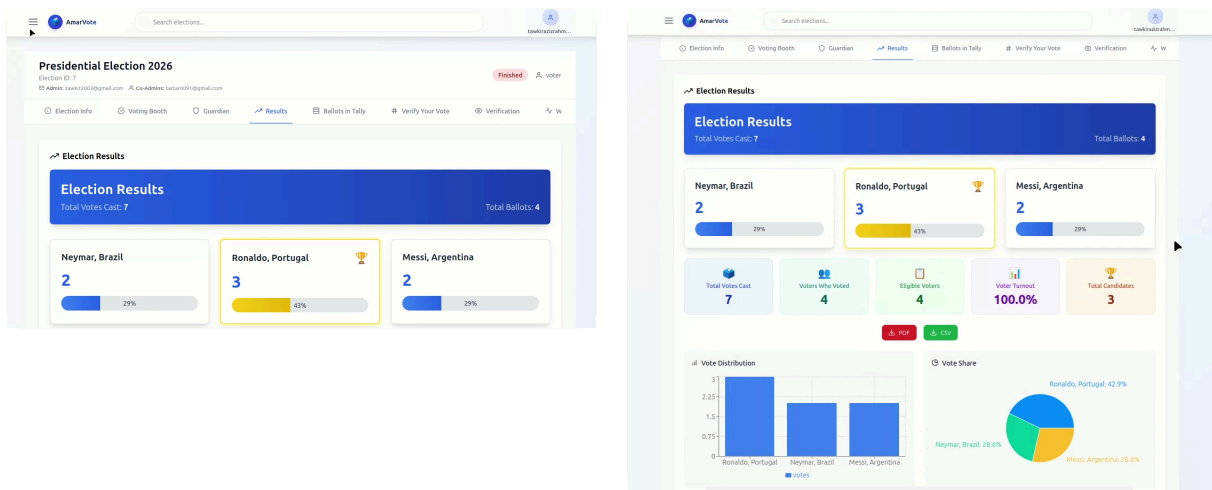

Figure 7: Results overview and detailed charts

Verify Your Ballot

Head to the **"Verify Your Vote"** tab and upload the receipt you saved. The system will match your tracking code with a ballot in the tally and compute the same ballot hash — confirming your vote was counted exactly as cast.

How to Verify Your Vote

Use either method below to verify that your vote was counted correctly in the final tally. You need both your tracking code and hash code from your vote receipt.

Upload Your Vote Receipt

Drag and drop your vote receipt file here (.txt or .json), or click to browse

Choose File

Understanding Verification Results

Verified: Your vote was found and the hash matches perfectly. Your vote was counted correctly.

Hash Mismatch: Vote found but hash doesn't match. This may indicate tampering or data corruption.

Not Found: Your tracking code was not found in the final tally. Your vote may not have been counted.

Vote Verified Successfully! ✓

Your vote was found and verified in the tally. Both tracking code and hash match perfectly.

Verification Details

Tracking Code: 7dc3fcc30f11169c18d98f4e3f15ab3e71cae274db2fcffe3a0b5c656be3f0ff

Hash Code: B290EEB77CA91BC36C106FC45D634F688755FA66229E8D211EAE64C6DBC9A657

Found in Tally: ✓ Yes

Ballot Status: cast

Understanding Verification Results

Verified: Your vote was found and the hash matches perfectly. Your vote was counted correctly.

Hash Mismatch: Vote found but hash doesn't match. This may indicate tampering or data corruption.

Not Found: Your tracking code was not found in the final tally. Your vote may not have been counted.

Note: This verification system provides cryptographic proof that your vote was counted correctly. The verification is performed against the official election tally and cannot be tampered with.

Browse All Cast Ballots

The **“Ballots in Tally”** tab shows every encrypted ballot that is part of the final result. You can manually search for your tracking code and verify that the corresponding ballot hash matches your receipt.
